## About Me!

I am a native of Chattanooga, Tennessee, but currently resides in Huntsville, AL. I am a single parent of two; a son, Ajazion Davis (nine years old) and a daughter, A'Tauriyah Clayborn (seven years old). I have maintained a G.P.A average of 3.73 in a STEM field (Computer and Information Science), and have been recently inducted in the National Honors Society, PHI THETA KAPPA. I plan to obtain my Bachelor's degree and also my Master's degree in CIS. I would love to service the community by communicating the value of education and using available resources.

## What are your plans after graduation?

My Goals are to open up a computer programming company. I would like to develop new types of software for upcoming and newly developed companies that need new systems built to be based around an engineering discipline that aims to study and analyze the communication process among various computing devices. Attend Alabama A&M University to further my education and continue to cater their specific needs. My computer networking company or computer systems that are linked, or networked, together to exchange information and share resources.
