1 **WELCOME AND INTRODUCTION**

2 CHAIRMAN KEISER: Thank you Susan. Well
3 good morning everyone. Welcome to day three of our meeting.
4 My goal is to get the meeting through by 12 o'clock because we
5 are going to have a lot of people leaving on their flights. If I may
6 welcome everybody and at this time invite our members to
7 introduce themselves since that side of the table seems so sparse
8 we'll ask Simon to start.

9 MR. BOEHME: My name is Simon Boehme and
10 I'm the student member.

11 MS. ALIOTO: My name is Kathleen Sullivan
12 Alioto and I'm an advocate and starter of a start-up involving
13 teaching parents and grandparents teaching their children to read 0
14 to 5.

15 MR. ETCHEMENDY: I'm John Etchemendy from
16 Stanford.

17 MR. PRESSNELL: Claude Pressnell the President
18 of the Tennessee Independent Colleges and Universities.

19 MR. WOLFF: Ralph Wolff, President at the
20 Quality Assurance Commons.

21 MS. PHILLIPS: Susan Phillips, Faculty University
22 at Albany and Leadership Fellow SAIL Institute State University

1 of New York and Albany.

2 MS. DERLIN: I'm Bobbie Derlin, I'm the
3 Associate Provost Emertis from New Mexico State University.

4 MR. WU: Frank Wu, Faculty, University of
5 California.

6 MR. KEISER: Art Keiser, Chancellor at Keiser
7 University.

8 MS. HONG: Jennifer Hong, NACIQI Executive
9 Director and Designated Federal Official.

10 MR. BOUNDS: Herman Bounds, Director of the
11 Accreditation Group at the Department of Education.

12 MS. MANGOLD: Donna Mangold, Department of
13 Education, OGC.

14 MR. FRENCH: George French, President, Miles
15 College.

16 MS. NEAL: Anne Neal, Senior Fellow American
17 Council of Trustees and Alumni.

18 MR. VAN AUSDLE: Steve Van Ausdle, President
19 Emeritus Walla Walla Community College.

20 MR. JONES: Brian Jones, President of Strayer
21 University.

22 MS. DAGGETT: Elizabeth Daggett, Department

1 staff.

2 MS. MCKISSIC: Stephanie McKissic, Department

3 staff.

4 MS. HARRIS: Doctor Nicole S. Harris,

5 Department staff.

6 CHAIRMAN KEISER: Well thank you everyone.

7 Today we have two topics we're going to be discussing. The first
8 will be the Oversight of For-Profit Institutions Conversion to Non-
9 Profit Entities and the second will be a discussion by our Sub-
10 Committee on Data led by Bobbie Derlin.

11 Now I'd like to introduce Jennifer Hong.

12 **OVERSIGHT OF FOR-PROFIT INSTITUTIONS**

13 **CONVERSATION TO NON-PROFIT ENTITIES**

14 MS. HONG: Good morning everyone. On the
15 agenda item for the Oversight of for-profit Institutions Conversion
16 to Non-Profit Entities. The reason why this is on the Agenda if
17 members look in their folders we received an initial letter from
18 Senators Warren, Brown, Murray, Derbin, Bloomenthal on -- dated
19 January 11th, 2018 and this was right before the last February
20 NACIQI meeting.

21 So in brief they wanted NACIQI to raise as an issue
22 and to include on its Agenda the oversight of accrediting agencies

1 approval of the conversions of for-profit entities to non-profits.
2 And because we got this late in the process for February we
3 broached it at the February meeting. Those of you may recall we
4 did receive the letter and we acknowledged it.

5 Consequently the same senators wrote the same
6 letter on February 15th which was timely enough for this meeting
7 and after conference with the Chair we decided to include it as an
8 Agenda item.

9 Some of the suggestions and I'll just read them
10 beginning on page 3 for the record that they suggest that the
11 Senators suggest to one -- insure that conversion of approval
12 processes are significant factors in NACIQI'S qualitative reviews
13 of accrediting agencies.

14 Two -- conduct briefings or forums on the dangers
15 of non for-profit conversions and three -- advise the Secretary on
16 setting specific standards that accrediting agencies must apply
17 when approving conversions in order to be recognized.

18 So we're opening up this issue for NACIQI to
19 discuss. We've received several oral comments that we'll hear this
20 morning. Just to kind of frame the discussion we've put up here
21 the relevant sections relative to the accrediting agencies under
22 602.22A2 Roman at 2I and I don't know that you can see it but this

1 is under substantive change provisions.

2 So currently under the current regulations
3 accrediting agencies are required to approve changes of ownership
4 and changes of control and the standard is that the approvals must
5 take place to ensure that an institution -- the change doesn't
6 adversely affect the institution's capacity to continue to meet the
7 Agency standards.

8 That is what we require agencies to do right now.
9 So for changes of control, changes of ownership, anything that
10 encompasses these conversions, the standard is that -- again,
11 accrediting agencies must insure that it doesn't adversely affect an
12 institution's capacity to continue to meet the accrediting agency
13 standards.

14 That's what we have currently and that's how the
15 staff and this Committee has been, you know, looking at
16 substantive changes that encompass changes of control and
17 ownership up to this point. So without further ado, I'm going to
18 hand it over to the Chair.

19 CHAIRMAN KEISER: Thank you, a couple of
20 things that I want to do before I give the little presentation would
21 be to tell everybody that we have a timer here and the timer will be
22 for 3 minutes -- 3 minutes are our normal process. At the end of 2

1 minutes a yellow light will come on and at the end of 3 minutes the
2 red light will come on.

3 I will then politely ask you to wrap up your
4 comments within a sentence or two, then I will ask you a second
5 time if you continue to go on and the third time they've given me
6 the power of this button here which then shuts off the mic.
7 Hopefully that will get your attention.

8 So please be advised that everything that is said is
9 recorded and transcribed, we are transcribing this yes, okay. So I
10 just wanted to make sure that you understand that the process
11 today we have 23 speakers today so 23 speakers is a lot of people
12 and so we're going to try to get through this as appropriately and
13 rapid as possible.

14 So again good morning and welcome everyone. I
15 want to take the moment to set the proper tone for the discussion
16 today, one that I hope will create a spirit of goodwill and foster a
17 robust but respectful debate regarding issues or actions that impact
18 higher education in America and this Committee's role in that.

19 I received a letter in January asking the Committee
20 to address the topic of concern to some senators and that is some
21 for-profit private colleges exploring the options to convert to non-
22 profit operations.

1 Without hesitation I agreed to put this matter on the
2 Agenda for comments and open discussion. It is our role to advise
3 the Secretary of Education and provide recommendations
4 regarding accrediting agencies that monitor the quality of higher
5 education institutions.

6 Today we will hear commenters discuss virtually
7 every aspect of this issue and passionately express their beliefs
8 about what is in the best interest of higher education and their
9 constituents.

10 And as Chairman I welcome the opportunity to
11 advance policies or actions by public or private schools that will
12 enhance the quality of education for all college students.

13 After agreeing to put this topic on the Agenda I
14 received another letter from the same U.S. Senators pointing to
15 Keiser University, my university, which I'm Chancellor of --
16 which became non-profit nearly 8 years ago.

17 They cited Keiser University as an example of their
18 concerns and requested that I recuse myself from this dialogue. I
19 have consulted with the NACIQI counsel and determined that my
20 recusal is unnecessary. We're simply listening and responding to
21 questions and opinions of the issue of for-profit conversion to non-
22 profit status.

1 I strongly believe my 40 years of experience and
2 knowledge in private higher education and career oriented
3 institutions can provide valuable insight, history and context that
4 should not be excluded from the discussion, especially when the
5 media is reporting on it to the public and they need to hear all sides
6 of this important argument.

7 So now I'd like to introduce our first speaker. The
8 first speaker is former Congressman Steve Henderson. Welcome,
9 please introduce yourself and make your remarks.

10 MR. GUNDERSON: Mr. Chairman the good news
11 is your timer is so small I won't be able to see when I've expired
12 my 3 minutes so you may have to use a more verbal one.
13 Members of the Committee, I'm Steve Gunderson, President and
14 CEO of the Career Education Colleges and Universities.

15 First all me to express my appreciation to you
16 especially you, Chairman Keiser, for even adding this topic to your
17 Agenda. To be honest nowhere in Section 106 of the HEA re-
18 authorization do I see language directing you or the Secretary to
19 make recommendations regarding corporate structure of an
20 institution of higher education.

21 But there is a much more important point than legal
22 authority. The reality is that the letter requesting this discussion

1 reflects a serious misunderstanding of the dramatic changes
2 occurring today within higher education.

3 At best, this is yesterday's issue. The lines between
4 public, private non-profit, or proprietary are yesterday's
5 boundaries. Every institution is engaged in some mixture or
6 combination of public, private and non-profit operations. Is there
7 anyone who suggests public institutions don't require academic
8 departments to be profitable?

9 Look at the current debate at the University of
10 Wisconsin, Steve's point and my home state regarding the
11 cancellation of entire academic departments because they are not
12 profitable.

13 The biggest difference between my sector and the
14 rest of higher education is who we serve and what we teach. Our
15 students remain primarily adult students seeking postsecondary
16 career education. Over the past 40 years proprietary institutions
17 faced two challenges -- they can't receive any kind of operating
18 subsidy even to serve low-income students.

19 Contrast this with state operating support for public
20 colleges exceeding 86 billion dollars last year. Second --
21 proprietary schools can't receive donations from individuals or
22 foundations. Contrast this with over 43 billion dollars in

1 philanthropic donations last year to all other colleges.

2 Career education colleges and universities serve
3 schools engaged in the common mission -- postsecondary career
4 education. Our membership includes private, non-profit,
5 proprietary and yes, conversion schools.

6 We have recently created a coalition of non-profit
7 career education colleges and universities. I recognize some
8 people just oppose our very existence -- that is their right. Let's
9 put this in perspective -- if you count all the conversions in recent
10 years you would not come close to 25 such conversions. This is
11 less than 1% of all proprietary schools using Title IV.

12 Such numbers make clear this discussion reflects a
13 conversation in search of a problem that simply doesn't exist. By
14 2025 we need 46.5 million new workers in America. Today 65%
15 of all jobs and 85% of all new jobs require some level of
16 postsecondary education.

17 We should be encouraging every school to do all
18 they can to help in this important mission and we should judge
19 every school by its outcomes, not by its current or former corporate
20 status.

21 Thank you for this opportunity to share these
22 thoughts. I close with a standing invitation to every member of

1 this Committee, we invite you to visit our schools, you will be
2 touched by the passion by which these instructors prepare students
3 for success in their chosen careers. Thank you.

4 CHAIRMAN KEISER: Thank you, our next
5 presenter is Erin oh -- any questions from the Committee -- oh
6 Frank?

7 MR. WU: So I have a question unrelated to the
8 issue of whether this is properly before NACIQI through this letter
9 from the people who wrote to us, members of Congress. The
10 question as a policy matter how should the Department of
11 Education address these conversions?

12 So if you were to advance some type of affirmative
13 proposal, what would be the appropriate way for the Department of
14 Education to regard these if to do anything at all. It may be that
15 your views may not be of concern at all.

16 MR. GUNDERSON: Thank you for the question.
17 As I indicated in my testimony we are moving into an area where
18 we are going to see outcome metrics and requirements and
19 transparency for every school of every type and every program
20 within those schools.

21 If I were at the Department of Education and I were
22 looking at public policy I would want to make sure that there was

1 no change in outcomes resulting from a change in corporate
2 structure any more than there is a change in our attempts by
3 changing accreditors or changing programs, et cetera. I think
4 that's what the Department has to do. They have to focus on the
5 outcomes.

6 MR. WU: Just a follow-up question. I want to
7 make sure I hear you correctly. So from your perspective, let's
8 take a rule on say gainful employment -- if it applied across the
9 board irrespective of the type of institution -- for-profit, non-profit,
10 converted, et cetera, that wouldn't be problematic as long as it
11 were applied evenly?

12 MR. GUNDERSON: Exactly. We have said one
13 set of rules for all schools. We are happy to abide by the same
14 requirements as everybody else. We don't necessarily like to be
15 targeted.

16 MR. WU: Thank you.

17 CHAIRMAN KEISER: Simon?

18 MR. BOEHME: Thank you so much for your
19 presentation and coming today. You said something that stuck out
20 to me that every single school should -- I'm paraphrasing,
21 outcomes are important.

22 MR. GUNDERSON: Absolutely.

1 MR. BOEHME: Okay. It was suggested or and I
2 don't know if you come to NACIQI often but we have a pilot
3 program where we ask accreditors to discuss what kind of data
4 they collect to discuss student outcomes.

5 And through media reports or through some
6 conversations, that pilot program may be endangered. Would you
7 recommend to the U.S. Department of Education -- would you
8 encourage us to continue to ensure that accreditors are held
9 accountable for student outcomes and that we continue to question
10 all programs and all institutions to continue to stay focused on
11 student outcomes?

12 MR. GUNDERSON: Absolutely. It may surprise
13 you but number one I think that the role of accreditation is
14 academic quality and so that ought to be the focus and we ought to
15 be looking at academic outcomes in particular and we ought to be
16 also looking at how we can achieve consistency in the definition of
17 those academic outcomes.

18 I mean one of the -- if we've learned one lesson
19 with the whole ACICS experience and with schools trying to find
20 new accreditation is that in all due respect, every accreditor has a
21 different definition of what career placement is, of what, you
22 know, all these standards are.

1 And you could meet it for one accreditor and not
2 meet that same standard with a different accreditor and I think we
3 have to have consistent definitions. I've tried to encourage the
4 Congress to do this because I am not sure in all due respect to my
5 friends in the accrediting business that they're going to sit down
6 and come up with those definitions, but it's fairness to the students,
7 it's fairness to the instructors and staff, it's fairness to the schools,
8 it's fairness to the policy makers.

9 MR. BOEHM: Thank you.

10 CHAIRMAN KEISER: Thank you very much
11 Steve, oh, Kathleen?

12 MS. ALIOTO: Just as a point of reference the
13 accreditors -- it's the institutions that are supposed to come up with
14 the standards and the accreditors make that judgment about
15 whether or not they are meeting their own standards.

16 MR. GUNDERSON: Well I think in today's world
17 where we want to provide current and potential students with the
18 most knowledge possible so that they can make the right decision
19 for themselves I think that there has to be a role above that of any
20 individual school creating its own standards.

21 I think we need to have some common standards on
22 what we mean by retention, what we mean by graduation, what we

1 mean by placement and right on down the line.

2 MS. ALIOTO: Alright well I'm not going to
3 quibble with you about that but my basic question is this is about
4 money so if you have a non-profit you said that it's better to be a
5 non-profit because you can receive -- what would --

6 MR. GUNDERSON: Philanthropic money.

7 MS. ALIOTO: You can receive the donations and
8 what else can you receive?

9 MR. GUNDERSON: Well I said you can receive
10 donations to scholarships, research, otherwise and I tried to point
11 out that the difference between public operating subsidies which
12 no proprietary school does receive and may or may not should
13 receive.

14 I believe we as a nation have got to look seriously at
15 this question of how are we going to provide opportunity for those
16 most in financial need of access? And I think that's not a debate
17 about whether it's a public or a private non-profit or a proprietary
18 school. That is a debate about what we as a nation are going to do
19 in providing those students most in need of assistance for access --
20 that access.

21 I mean I'm going to share with you an issue that we
22 deal with a lot which is what's the right/wrong answer on 90-10?

1 And the way I place this is assume there are 100 students in our
2 school and we -- 90 of them are on federal financial aid.

3 MS. ALIOTO: Which is true now.

4 MR. GUNDERSON: Yeah.

5 MS. ALIOTO: So whether it's public or private.

6 MR. GUNDERSON: That's right.

7 MS. ALIOTO: That money is going from federal
8 dollars to schools.

9 MR. GUNDERSON: But no, financial aid goes to
10 the student and the student chooses which school to use it at. This
11 is not institutional aid, this is student aid -- very important
12 difference. And the problem with something like 90-10 is the
13 school literally has to say which one of these low-income students
14 should I enroll and which ones should I not enroll because if I
15 enroll that student I exceed the 90-10.

16 And it's the same issue if you're going to move the
17 GI monies into the 90-10 debate then you say do I enroll that
18 veteran or do I enroll that low-income student? A school should be
19 able to enroll any students who want to go there to pursue their
20 academic learning in their career education.

21 MS. ALIOTO: Could you get back to my original
22 question -- how does the money go? If it goes from for-profit to

1 non-profit then there's no tax, correct?

2 MR. GUNDERSON: Well you're absolutely right.

3 A non-profit doesn't pay taxes.

4 MS. ALIOTO: Right.

5 MR. GUNDERSON: But we don't give much

6 credit for paying taxes either.

7 MS. ALIOTO: So what -- how will the non-profit

8 in your dream world, where would the non-profit -- where would

9 that non-profit money go, that wouldn't be going for taxes?

10 MR. GUNDERSON: Well most of the schools that

11 have converted have had some type of fund that they have moved

12 it into a philanthropic vehicle -- some type of distribution. Once

13 they make that conversion no different than the hospitals when

14 they have converted -- they made that same kind of a philanthropic

15 use of those funds, those assets once they make that particular

16 conversion.

17 MS. ALIOTO: Okay so then my final question is

18 when we have looked at the score card and other data approaches

19 to education it doesn't appear -- I mean there are some private

20 schools, some public schools that are doing a great job with low-

21 income people and there are others that are doing a miserable job

22 and I'm not sure that in terms of your transfer from a for-profit to

1 non-profit that those particular students are actually being met -- I
2 think that's the rub and what happens to students.

3 MR. GUNDERSON: As I said earlier you, the
4 Department, the Congress, everybody ought to judge that school
5 on its outcomes and I would say service to a certain percent of low
6 income students as a part of its enrollment ought to be one of those
7 outcomes and that ought to be consistent whether they are
8 proprietary school, they are a non-profit school or they are a public
9 school.

10 We ought to -- and I strongly support moving
11 towards additional PELL incentives for schools that serve a large
12 number of PELL students. I mean we have to figure out how
13 we're going to provide the access or we're never going to give this
14 opportunity for people to move up in American society.

15 MS. ALIOTO: Thank you.

16 MR. KEISER: Brian then John.

17 MR. JONES: Good morning.

18 MR. GUNDERSON: Good morning.

19 MR. JONES: It seems to me that much of this was
20 down to questions of governance and you know, I think of a
21 analogue -- not perfect analogue but I for example, I chaired the
22 authorizing board in DC for the city's Toter School, Toda is of

1 course a non-profit entity. Many of them though have
2 relationships with for-profit entities, management companies and
3 the like.

4 And the challenge from an oversight perspective
5 often had to do with the transparency of the governance. And it
6 does seem to me that in the case of many of these conversions that
7 part of the challenge is moving where the governance
8 accountability lies to Kathleen's point about the flow of dollars and
9 things like that -- the ultimate check is sound governance.

10 So I'm curious where do you see the right oversight
11 role for evaluating the quality of the governance structures in these
12 conversions? Is that a Department responsibility? Is it an
13 accreditor responsibility? Is there a role for associations like yours
14 that establish best governance practices?

15 How do we sort out this question making sure that
16 there is appropriate governance?

17 MR. GUNDERSON: That is a question we could
18 spend all day on. I tend to think that the accreditors do have a role
19 in governance. I mean, because as I look at the triad I have always
20 understood state licensing refers to consumer protection. The
21 Department's role is to look at the fiduciary responsibilities as they
22 relate to access to Title 4 and so the third leg of that triad is the role

1 of the accreditors.

2 And I think it is the role of every accreditor to look
3 at every institution in terms of appropriate governance within its
4 organization or institution.

5 CHAIRMAN KEISER: Before John, Jennifer has
6 something to say.

7 MS. HONG: Real quickly -- thank you for asking
8 the question Brian, it just reminded me. What we have the board is
9 with regard to the oversight of the accrediting agencies approve all
10 of these changes.

11 Separately the Department currently has its own
12 approval process of these conversions and we do have folks in the
13 room that can speak to that process later on when we have the
14 discussion but our Office of Federal Student Aid does approve
15 these conversions separately.

16 MR. GUNDERSON: Yeah I was referring to
17 Section 106 of the Reauthorization of 2008 which talked about the
18 functions of NACIQI, I was not talking about the section you have
19 on the slide.

20 CHAIRMAN KEISER: John?

21 MR. ETCHEMENDY: Yeah, let me just start by
22 saying that I think that your comment that the funds and the

1 student aid funds do not go to the institutions -- it's simply
2 disingenuous. I mean we know that yes, it is the student has to
3 qualify but often it's the institution itself that applies for the
4 money, makes sure that the student gets the money. The student in
5 many cases doesn't even know that they're eligible for the money.

6 I agree with you however, that the 90-10 Rule -- I
7 mean I take it that you don't like the 90-10 Rule. I agree with you
8 that it should apply to every institution regardless of structure. I
9 actually think it should be an 80-10 Rule and the VA funds should
10 be included along with the other funds in the 80% limit.

11 When you say that well, you know, part of the
12 mission of many of these universities should be to serve low
13 income students and I think that's right -- you said serve some
14 number of low income students, I think that's right.

15 90% of your students is quite a number of low
16 income students that you can serve. I think the fact that by getting
17 rid of the 90-10 Rule or for that matter having a 90-10 Rule that
18 excludes veteran's assistance is simply a way of taking away any
19 market mechanism to test the value of the university.

20 Now I'm a great believer in the free market and I
21 think that we should have market mechanisms and the fact that
22 people are willing to pay their own money is some test of that.

1 Now the 90-10 Rule only makes it 10% or less have to actually pay
2 their own money but I think it's a very valuable rule and should be
3 strengthened.

4 MR. GUNDERSON: So here's a compromise
5 because I don't -- you and I have different positions but here's a
6 compromise. Why don't we require that every school in America
7 has to have 50% of their students PELL eligible -- just start with
8 that and see what that does because then we will get some response
9 in terms of providing access to low-income students.

10 The reality is and this is a much bigger social
11 conversation -- hopefully not a debate about when you are looking
12 at those who pursue a career -- mid-level skilled career, rather than
13 a liberal arts education, you are dealing rightly or wrongly with
14 those who tend to be first generation college students, come from
15 low income families, have never felt that they had the background
16 and the preparation where they could succeed at what you and I
17 would call a high quality liberal arts school.

18 And so we are dealing with a very different
19 constituency and I have always believed that all the debates we
20 have about different structures of colleges and universities should
21 never override our conversations about universal access regardless
22 of economic status.

1 CHAIRMAN KEISER: Claude?

2 MR. ETCHEMENDY: I don't disagree with any of
3 that. I mean I think it's an incredibly important mission and these
4 students should be served and the students should be protected and
5 that's what we're concerned about is are the students in fact
6 protected?

7 And I believe that the 90-10 Rule among other
8 things is partly there to help protect the students by inserting a
9 market test into the institution.

10 MR. GUNDERSON: One of the things I hope you
11 all remember and this is to all of my colleagues who are in higher
12 education associations -- I have consistently said there were
13 schools in my sector who did a bad job.

14 I think most of those schools in my sector that did
15 bad jobs are also history. You can't look at the 2010 data and try
16 to make policy decisions in 2018. Over 2000 of our campuses
17 have closed in the last 8 years. We are a very different sector
18 today. We sort of have gone back to our roots, we are focused on
19 postsecondary career education, not online liberal arts education
20 part-time, two adults, single family with a job.

21 I mean that's a business model destined for outcome
22 problems but that's not who we are today and I plead you look at

1 who we are today, not what we were.

2 CHAIRMAN KEISER: Claude, again we're going
3 to have a conversation at the end. And I don't want to cut-off
4 anybody but you know if you want to make your points we can
5 make them all at the end but that's up to you. Claude I don't mean
6 to cut you off.

7 MR. PRESSNELL: You're trying to cut me off.

8 CHAIRMAN KEISER: I just -- I just have the
9 problem of being the Chair and trying to keep things moving
10 along.

11 MR. PRESSNELL: I was actually a little surprised
12 that we were taking questions anyway at this point in time.

13 CHAIRMAN KEISER: Well we always have.

14 MR. PRESSNELL: Okay well this is good. So
15 well and first of all you know, to your last comment that you just
16 made about who you are today versus who you were then -- self-
17 regulation wasn't working too well then and so you are where you
18 are today because of a lot of pressure that was put on your sector
19 and so you have to recognize that.

20 Let me ask you -- I mean the point of this is for-
21 profit and non-profit conversions and whether or not that's in the
22 best interest of higher education, best interest in the students, you

1 that's why I thanked you for having the conversation whether or
2 not there's jurisdiction in this area. The reality is if schools were
3 converting simply to avoid regulation, after the 2016 election they
4 would have stopped.

5 They saw a new administration coming in, they had
6 a very different perspective on regulations and they just said I'm
7 going to quit paying all these lawyer fees and all these other costs
8 and I'm just going to stop doing it. So I don't think that's what
9 we're dealing with here is schools trying to avoid regulations
10 anymore.

11 I think to be honest with you -- and this is speaking
12 from real life experience with some of these schools. The
13 incessant opposition to our sector's very existence by some people
14 has convinced these families that own these schools -- especially
15 the next generation, that they want no part of it. They're not going
16 to go into it and I could name schools for you which I won't do
17 because I think it puts them in a non-fair position of attack by our
18 opponents.

19 But I know schools where the younger generation
20 has refused to join or enter that school operation and for that
21 school to survive and continue, their only option is to convert to a
22 non-profit status.

1 CHAIRMAN KEISER: Thank you Steve. The
2 next person to speak is Aaron Shenck, Executive Director of the
3 PAPSA.

4 MR. SHENCK: Well good morning, my name is
5 Aaron Shenck. I'm the Executive Director of PAPSA. We're a
6 non-profit bipartisan state association in Pennsylvania that
7 represents technical colleges and postsecondary trade schools.
8 Our membership includes schools that educate in a huge diversity
9 of career fields.

10 From my testimony today I think it's relevant to
11 state our membership of PAPSA is made up of institutions that are
12 both non-profit and for-profit for tax purposes and we also have a
13 small number of members who are actually considered public.

14 For full transparency I want to disclose that one of
15 our member institutions completed a for-profit non-profit
16 conversion about a year ago, however in my knowledge I'm not
17 aware of any of our other members that are currently considering
18 this process.

19 I state that because I want to be clear that I'm here
20 today speaking with my own thoughts. I'm not here on behalf of
21 any single institution or interest. The reason why I did come today
22 is I am a strong advocate for several issues directly related to this

1 conversation.

2 One -- I want to make sure that regulators and
3 policymakers focus on student outcomes that are decision-making.
4 Two -- tax status of institutions do not determine outcomes. Three
5 -- higher ed policy should be equitable and reasonable across
6 sectors regardless of tax status.

7 Four -- federal policy should not stifle innovation
8 but should support it and five -- there should be respect
9 jurisdiction's rule of law processes and bias and political objection
10 should not supersede that. All these sub-issues are tied in the
11 conversation today around conversions.

12 Let me start by saying tax status I said does not
13 determine student outcomes. There are countless examples of
14 positive success stories from all sectors of higher Ed including
15 public, non-profit and for-profit. I have myself personally visited
16 over 100 campuses of all those different sectors and I've seen
17 many different success stories regardless of tax status.

18 Just as one small example to highlight -- Forbes
19 Magazine did a comprehensive national study on postsecondary
20 technical trade schools that they published in June of 2017 and
21 named the top 30 trade schools in the country by their calculation,
22 their methodology.

1 I'm proud to say five of those are Pennsylvania
2 institutions and our members. And I say this not to boast about our
3 members but to highlight something relevant to this conversation
4 today. Out of those 5 schools, 2 of them are for-profit institutions,
5 1 was non-profit, 1 was affiliated with a public institution and the
6 5th was a historically for-profit institution that was being acquired
7 by a non-profit at the time.

8 This one small subset of schools I think helps paint
9 the broader issue of how I believe that tax status should not be a
10 determinant when we deal with outcomes. Now that I've made
11 these general statements let me dive deeper into the topic directly
12 in front of us today of conversions.

13 First, it's important to note there are many different
14 ways an institution can be organized for tax purposes. For-profits
15 can be individually owned, partnerships, small corporations, large
16 corporations and there are some that are ESOP'S which are owned
17 by employees.

18 Public institutions may be state owned, community
19 colleges, land grants, then there's non-profits and there's a small
20 number of schools what are called public benefit corporations.
21 There are also many partnerships and arrangements where
22 institutions from different tax structures partner with one another

1 on different programs and agreements.

2 The Purdue University Kaplan Agreement is
3 probably the most notable and most recent and largest that most
4 people are aware of, but there are many, many much smaller
5 arrangements that are put together between different tax status,
6 they're a benefit of the students.

7 CHAIRMAN KEISER: Try to wrap it up.

8 MR. SHENCK: Yep, let me go right to my closing
9 comments then on processes.

10 CHAIRMAN KEISER: Thank you.

11 MR. SCHENCK: Two minutes from this point.
12 My final points are more around process suggestions. I would say
13 to do whatever process there is in place we need to respect it. We
14 know the IRS, in reality, is the proper agency to make
15 determinations of tax status.

16 CHAIRMAN KEISER: One sentence, try to wrap
17 up.

18 MR. SCHENCK: I'll tell you what I will just close
19 again saying again focus on student outcomes, tax status is not a
20 precursor to good or bad outcomes, federal policy should be
21 equitable, should support innovation and respect jurisdictions.
22 Thank you.

1 CHAIRMAN KEISER: Thank you, Frank?

2 MR. WU: Just one question. You referred to tax
3 status. I just have a question about what the difference is between
4 for-profits and non-profits, in your view. Is it only the tax status or
5 because for-profits answer to shareholders and to others might
6 there be differences, incentives and behavior?

7 So is there anything meaningful about the
8 difference or should we just -- and accreditors, just treat them as all
9 identical other than tax status?

10 MR. SCHENCK: I would answer that two ways.
11 When it comes to outcomes I don't think there should be a
12 difference. In my view it's not so much the inputs but in terms of
13 whether it's tax status, structure, the incentives to create the
14 outcome, in my view it's what outcomes at the end is what's most
15 important.

16 But there certainly is in my view, differences in the
17 incentives in terms of how we get there and that may change by
18 what kind of either for-profit, non-profit you are. I mean as I said,
19 the corporate ones -- yes they answer to shareholders but many of
20 the for-profits that we talked about that I represent are individually
21 family-owned schools that have their life investment, you know,
22 basically built in that school and their motive is to make sure, not

1 only that their business survives but they know that if they don't
2 educate their students and create a successful outcome that their
3 business is dead.

4 So there are certainly different incentives within
5 those structures.

6 CHAIRMAN KEISER: Thank you very much.

7 MR. SCHENCK: Thank you.

8 CHAIRMAN KEISER: Our next presented is
9 Robert Shireman, Senior Fellow from the Century Foundation,
10 welcome.

11 MR. SHIREMAN: Thank you so much. Mr.
12 Chairman and members of the Committee, thank you for the
13 opportunity to testify today. My name is Robert Shireman, I'm a
14 Senior Fellow at the Century Foundation.

15 Repeated scandals in for-profit higher education are
16 frequently portrayed as intentional frauds perpetrated by bad
17 actors. I do not believe that the mistreatment of students has
18 primarily been caused by bad people. The problem is bad
19 incentives.

20 And the purpose of a non-profit entity is to impose
21 strict, internal restrictions that in the words of one expert cited in
22 the materials that I provided you, decreases their incentives to take

1 advantage of under-informed consumers. Treating students well is
2 not just about compliance with laws against false advertising or
3 against paying bounties to recruiters -- it is about every day
4 business decisions that can go legally either way -- like whether to
5 tell a prospective student that a college is not a good fit, whether to
6 correct a student's mistaken impression that her health assistant
7 courses will transfer into a nursing program, whether to decrease
8 costs by increasing class sizes, whether to pay recruiters more than
9 instructors and whether to require students to sign away their legal
10 rights by inserting an arbitration clause into an enrollment contract.

11 Who has the power to make these decisions?

12 Where the control is in the hands of investors or others with a
13 financial interest, it is far more likely students end up hurt as a
14 result of the decisions the college makes. We see this damage in
15 default rates, in loan repayment rates, in employment outcomes
16 and in fraud complaints, filed by former students seeking federal
17 loan relief -- more than 98% of which are about for-profit colleges.

18 Some for-profit colleges have thousands of fraud
19 complaints. Most non-profit and public schools have maybe zero
20 or a few. Southern New Hampshire for example with 100,000
21 students enrolled has three. It is telling that the top three non-
22 profits and fraud complaints with 92, 76, and 75 are non-profits

1 that converted by retained the money-making incentives of their
2 former owners.

3 I have here an enrollment contract from one of these
4 converted for-profits. It has an arbitration clause, but worse it says
5 that if the school wins in the arbitration, the student pays and if the
6 student wins the student still pays, heads I win, tails you lose.

7 That is a clear sign of a predatory college focused
8 on compliance -- making money without going to jail rather than
9 an ethical and excellent treatment of students. Valid non-profit
10 governance does not guarantee a perfect college but it does
11 encourage business decisions that are more aligned with student's
12 interest and in the public interest.

13 We need NACIQI's leadership to preserve and
14 enforce valid, non-profit control of colleges and to prevent for-
15 profit colleges from applying a misleading non-profit label. I'd
16 like to end with one quote from 1997 from the head of the For-
17 Profit College Association, Steve Gunderson's predecessor who
18 said that the 1992 regulations had had a purifying effect on the
19 sector and that a stronger group of schools is emerging.

20 That person became the head of ITT Tech which
21 then defrauded students in the early 2000's. This keeps happening
22 over and over again and we can't let that happen. Thank you.

1 CHAIRMAN KEISER: John?

2 MR. ETCHMENDY: So, Bob, could you say -- so
3 I mean I take your point. I think there are some very bad actors in
4 the for-profit sector. There are no doubt some bad actors in the
5 non-profit sector and -- but I do take your point that the difference
6 in structure -- the non-profit strictures do decrease the incentive on
7 the part of the decision-makers to act badly toward their students, I
8 guess.

9 Could you say something about why or whether you
10 think the same observation should apply to the medical
11 establishment? And we have for-profit hospitals, we have for-
12 profit medical practices and so forth and so on and of course we do
13 also have abuses but they -- I don't know that it is particularly
14 concentrated on the for-profit sector, I just don't know.

15 MR. SHIREMAN: Yeah, so I think the comparison
16 to the medical risk to health care is very interesting and some of
17 the Seminole work that has compared for-profits and non-profits in
18 the same industry has been in healthcare where they found that in
19 fact the non-profits were engaging in better care in precisely the
20 same kinds of situations.

21 The for-profits for example, for-profit nursing
22 homes I believe it was were providing four times more sedatives in

1 the same medical situation because it's cheaper and easier to
2 provide a sedative than to provide other kind of care in a nursing
3 home. So some of the research that shows that in fact non-profit
4 governance, when it's valid has a positive effect on outcomes and
5 is in effect a consumer protection mechanism. That research much
6 of it comes from healthcare.

7 Healthcare is also an interesting comparison
8 because for-profit hospitals, you sort of get this sense, you know,
9 why don't the for-profits in higher education enroll higher income
10 students? The reality is if you look at for-profit hospitals, higher
11 income people have nothing against for-profits per se and they are
12 actually more encouraged into for-profit hospitals and it actually
13 helps to improve the quality of those for-profit hospitals because
14 they're being held accountable by higher income people who are
15 looking for stronger kind of care situation.

16 You also have in hospitals -- you do have a
17 difference which is the doctors themselves are licensed and you
18 don't have licensing of faculty in higher education so there's some
19 differences there to help to create some protection in health that we
20 do not have in education.

21 But I do think it is useful to kind of think about why
22 do the for-profits in education feel that they have to enroll only

1 low-income students. Is it truly just because they think they're
2 unserved or is it because they can get away with serving them
3 poorly in a way that they would not be able to get away with if
4 they were enrolling higher income people.

5 CHAIRMAN KEISER: Ralph, Claude then Simon
6 and please try to remember we're under time.

7 MR. WOLFF: I understand, Rob you used the
8 phrase NACIQI should exercise leadership and I just wondered if
9 you could be specific in light of the statutory or regulatory phrase
10 that Jen raised around substantive change.

11 I mean what would leadership at that time look like
12 to you?

13 MR. SHIREMAN: I think that leadership would
14 involve NACIQI telling accreditors that when you are reviewing
15 them that you will look specifically at their standards and the use
16 of their standards in reviewing governance and conversions from
17 for-profit to non-profit so the validity of those conversions -- so in
18 your role of oversight.

19 And then second as an entity that makes
20 recommendations to the Secretary, that you recommend and I
21 would say as soon as possible, recommend to the Secretary a
22 temporary stop of any such conversions while the Secretary --

1 while the Department of Education reviews the processes and
2 recommend that those processes include public notice of a
3 conversion that has been proposed and an opportunity for public
4 input into that conversion -- all of these conversions are happening
5 behind closed doors.

6 By the time we find out about them it's done and
7 that means we don't have the best minds thinking about is this
8 structured well, is there something nefarious going on here? Is this
9 a real non-profit conversion?

10 CHAIRMAN KEISER: Claude, Simon, Federico,
11 please remind you we have 22 more.

12 MR. PRESSNELL: Thank Bob, good to see you.
13 Our limitations are -- we have statutory limitations on what we can
14 look at so in the conversion is a substantive change that accreditors
15 do look at so accreditors are watching these things take place so
16 I'm not sure what you mean by behind closed doors because it is
17 being done, at least in the accrediting bodies are having to approve
18 these things.

19 My question for you though is based on your earlier
20 comments it seemed to not matter if they were for-profit or not for-
21 profit. You cited an example where a for-profit converted to a
22 non-profit and maintained the same predatory practices. So I'm

1 wondering is the solution really a statutory solution around
2 predatory practices or you know, because you've got -- you have
3 institutional audits, you've got FSA audits, you've got IRS audits
4 for the non-profits to take place, you've got -- you know you've
5 got the triad, you've got all these other things but somehow we're
6 missing your primary concern in that structure so could you maybe
7 --

8 MR. SHIREMAN: Yeah, so the problem in being a
9 valid non-profit is a regulation why it is just totally disingenuous
10 for the industry to claim that they're not being treated equally.
11 They are. Non-profits are required to place all of their revenue
12 back into the education and are prohibited from having people at
13 the top making -- or in any decision-making role, who are taking
14 the equivalent of profit.

15 So those are very strict regulations on the finances
16 of an institution. It is legal for a -- a person can donate to a for-
17 profit entity but they don't because they know that the owner can
18 just put it in his pocket. A non-profit has people who are not
19 allowed to take the money who decide whether it is being spent
20 well and that's why people -- that's why especially when you have
21 something that is difficult to monitor and this gets to your question
22 about you know, let's just prohibit all of -- all fraudulent activity.

1 Well that question of whether -- whether this is the
2 right institution for this student is not the kind of question that you
3 can regulate a precise answer to that. And education is about
4 hundreds and thousands of those judgment calls that cannot be
5 regulated from afar which is why it is better for it to be under the
6 control of people who can -- who are not looking to make money
7 off it themselves.

8 They are in an additional accountability kind of role
9 but that has to be enforced in these situations where -- I think you
10 need to separate into two different categories -- the problem you're
11 describing is no regulation is perfect. Being a non-profit is not
12 going to make you perfect just as telling people they can't drink
13 when they drive doesn't mean that all drivers are perfect. There
14 are still people who get into accidents and make stupid decisions
15 and are distracted.

16 So we can't just take examples of distracted drivers
17 who got into accidents and say well, that means we shouldn't be
18 caring about, you know, texting and driving because you can get
19 into an accident in any kind of way.

20 But non-profit status itself does need to be enforced
21 and the problem is the IRS is no longer enforcing non-profit --
22 valid non-profit status and you'll hear from some non-profit

1 lawyers later today talking about what's happened there. So non-
2 profits -- valid non-profit status needs to be enforced so that these
3 covert for-profits that have applied a non-profit label are not
4 allowed to do so and then non-profit status will have meaning.

5 Will have more meaning --it has more meaning in
6 the United States than anywhere else in the world. We don't want
7 the higher education systems they have in the rest of the world
8 where there's very little distinction between non-profit and for-
9 profit.

10 CHAIRMAN KEISER: If I may again, we're going
11 to lose our quorum right around noon-time so please if the speaker
12 -- because we want everybody to have a chance to speak so if your
13 question is really critical please and if the speakers would please
14 try to answer the question directly. Thank you, Simon you're up.

15 MR. BOEHME: Okay thank you and I'll be quick
16 and hopefully the response will be quick too. Do you believe that
17 any for-profits should be converted and if so, what does the
18 legitimate conversion look like?

19 MR. SHIREMAN: A legitimate conversion would
20 be to an entity that has no connection to -- so a purchase by a
21 completely separate entity. I think actually the ECMC purchase of
22 the Corinthian colleges was a legitimate conversion to non-profit

1 that I have some quibbles about the fact that ECMC pays its board
2 members but you didn't have any of the former owners involved in
3 figuring out what the evaluation should be and then being paid as
4 landlords and accreditors of a converted institution -- so that's an
5 example of one.

6 CHAIRMAN KEISER: Brian?

7 MR. JONES: I'm interested in your know, thoughts
8 about the evolving landscape in higher education where you do
9 have for example, public and non-profit institutions partnership
10 with for-profit entities to take large programs online.

11 Or in that case, you cited southern New Hampshire
12 and look at Liberty and others where you have non-profits --
13 publics that are growing very fast. You said that the non-profit
14 model requires that all profit be recycled in the educational
15 purposes but we also know that those big online institutions
16 whether you're for-profit or non-profit, spend a lot of money on
17 marketing.

18 Southern New Hampshire last year spent almost
19 100 million dollars on marketing. Western Governor's about 35
20 million. So in that light I'm wondering if the idea that the non-
21 profit model in and of itself is you know, is a guarantee or an
22 indicator of quality or student service is really misplaced.

1 And I wonder if Claude isn't really on to the rate
2 thing when he said that really shouldn't the focus be on making
3 sure that accreditors and the Department and the states are focused
4 on making sure that -- A -- as I said before that governance is
5 transparent.

6 I agree with you that these covert conversions are
7 not a good thing but if we're making sure that governance is
8 transparent and you're protecting against fraudulent and other bad
9 activity, isn't that really where the focus of accreditors -- the
10 Department and the states ought to be?

11 MR. SHIREMAN: I think if it was possible to -- I
12 think it's important to think about the role of accreditation as like
13 the entity providing the driver's license and that non-profit, for-
14 profit and public is the question of who is the driver and what are
15 their incentives?

16 And you're going to have much more impact on
17 good driving of a school by focusing on who is the driver and what
18 is their incentive rather than just who issued the driver's license.
19 And what you're asking is can we have the issue of the driver's
20 license pay more attention to what's happening of the driving of
21 the car and it's just not possible in the running of the school.

22 I think it is very positive that we have non-profit

1 and public institutions that are aggressively trying to enroll
2 students who have not traditionally enrolled in college. I think
3 they are more capable of stopping when it gets out of hand than
4 and I think the evidence suggests that they are more capable of
5 stopping when it gets out of hand because they're not blinded by,
6 because they're not blinded by that profit motive and they don't
7 have investors that are eager for a higher stock price which
8 admittedly and folks in the for-profit industry admit that that has
9 an impact and they have to resist it and you don't have that in the
10 non-profits.

11 MR. JONES: But talking about in the case where
12 the institution is partnered with a for-profit entity that may have all
13 those incentives whereas you do have some concern with a
14 converted number.

15 MR. SHIREMAN: It's absolutely a concern when
16 an institution basically contracts with somebody to run everything
17 and I do have concerns when these are percentage of tuition kinds
18 of approaches. I think there are some real hazards there. We
19 haven't seen them explode with problems but it feels like that
20 could happen at any moment, yes.

21 CHAIRMAN KEISER: Thank you, Frank real
22 quick?

1 MR. WU: Yeah very quickly. I was actually a little
2 puzzled but I think Claude and Brian helped me grasp your
3 comments. I understand you to be saying that for-profit
4 institutions have a different set of incentives and it's not whether
5 they're good people or bad people because of the incentives, they
6 just behave differently and that behavior is detrimental to students?

7 MR. SHIREMAN: Yes.

8 MR. WU: As compared to --

9 MR. SHIREMAN: More likely to be detrimental to
10 students, yes.

11 MR. WU: So here's what I was wondering. I was
12 wondering well, why does he oppose conversion then because if
13 the for-profits have these bad incentives and the non-profits don't,
14 you should be celebrating conversion?

15 But I hear you saying two things so I just want to
16 repeat back what I heard you say. Two reasons these conversions
17 trouble you -- some of them, not all of them, but some of them.
18 The first reason is they're conversions in form but not substance.

19 In other words, it's the same people. They've
20 created some type of legal structure which is nominally non-profit.
21 That is it superficially has the appearance of being a non-profit but
22 either the same people are involved or they're being paid salaries

1 or they own the land, they are receiving rent -- there's some way
2 that they can still extract what is essentially profit from a non-
3 profit -- that's the first reason.

4 The second is you're saying the IRS has become lax
5 in enforcement of some of the aspects of non-profit status which
6 allows these bad practices. If the conversion were pure to a --

7 MR. SHIREMAN: Yes.

8 MR. WU: To other third parties and were real
9 conversion you'd be here saying, that's good.

10 MR. SHIREMAN: Absolutely, yes. In fact when I
11 first heard about colleges converting I thought that's great, that's
12 great it will help to make sure that students are served better and it
13 wasn't until a few years ago when I wrote the report that I think we
14 submitted where we saw that former owners, basically found a
15 non-profit organization, had it sign the promissory note to them for
16 hundreds of millions of dollars, kept the property, sold the name of
17 the institution and then were paid for the rent on the property, paid
18 for the loan, the so-called loan that the school made that involved
19 no real transfer of cash and maintained other lines of money into
20 them.

21 And you know, feed money to people on the Board
22 in ways where it's not a real non-profit.

1 CHAIRMAN KEISER: Thank you next speaker is

2 -- what?

3 MS. NEAL: Sorry Art, it's good to see you Bob
4 and I agree on many things and disagree on others and I guess as
5 I'm listening to you today what I'm hearing is that students going
6 to for-profit schools have been treated with regular and repeated
7 cases of fraud and abuse that should disturb us all.

8 And what I think I'm hearing second is that when
9 we look at non-profit and public institutions students there who are
10 receiving billions of dollars in taxpayer subsidies and my money
11 regularly, they really don't have a problem when they look at
12 massive debt loads that they're being forced to hold when we look
13 at graduation rates at 4-year which are less than 40% but that
14 somehow that universe of students has no complaint, it's only the
15 students that go to for-profits. I guess I'm having some difficulty
16 with that.

17 MR. SHIREMAN: I think you'll find that I have
18 been critical of all sectors of education in ways that none of them
19 are pleased about and that at the same time it is statistically true
20 that somebody entering a for-profit college is 200 times more
21 likely to end up feeling that they were defrauded than someone
22 entering a non-profit college based on the data that exists.

1 And so as with a lot of other regulations, non-profit
2 is a regulation -- it's useful and I worry that we have institutions
3 that don't even recognize that they have different incentives that
4 are causing those problems for those students.

5 MS. NEAL: And would you agree that
6 accreditation started and remains largely a peer review process?

7 MR. SHIREMAN: I would agree it started that
8 way. I'm not sure I think it's a real mix right now in terms of --

9 MS. NEAL: And do you think that faculty and
10 administrators who for the large part our composed accrediting
11 bodies, that these are energies that are able, qualified, to review
12 fraud and abuse or is that something that would more properly be
13 in a consumer protection bureau as opposed to faculty and others
14 who have been asked to assess educational quality?

15 MR. SHIREMAN: I think accrediting agencies
16 don't usually have the kind of police powers, subpoena powers, et
17 cetera that's appropriate for a kind of fraud approach but I think
18 it's also important to recognize that certainly some students were
19 defrauded but a lot of them -- they were never actually lied to.

20 There was just a lot of wink-wink, nod-nod kinds of
21 things that were -- that really are quality kinds of issues like quality
22 advising of students that -- that accreditors can and should review.

1 MS. NEAL: As Congress and as we go forward
2 looking at accreditation as it currently exists, there has been quite a
3 bit of discussion about double standards if you will in terms of
4 what we expect in the regulatory restrictions on for-profit schools
5 and national accreditors vis-à-vis regional and non-profit schools.

6 Is there some sense in your mind that there needs to
7 be some parity across the -- across institutions -- non-profit and
8 for-profit so that the same standards apply to everyone?

9 MR. SHIREMAN: I think that every school should
10 have an oversight body that controls the budget of the school that
11 does not have a financial interest, so sure, I'm for parity and that
12 parity -- if we're going to have parity it needs to include that
13 kind of parity.

14 CHAIRMAN KEISER: Thank you, the next
15 speaker is Christopher J. Madaio, Assistant Attorney General from
16 the Consumer Protection Division, the Attorney General of
17 Maryland.

18 MR. MADAIO: Thank you Chairman, NACIQI
19 Committee, Christopher Madaio, Consumer Production Division,
20 Office of the Attorney General of Maryland. My office and other
21 state consumer protection divisions enforce our states unfair and
22 deceptive trade practice laws.

1 In recent years we brought cases against at least 13
2 for-profit schools which include EDMC, Kaplan, DeVry, Career
3 Education Corporation and of course Corinthian and ITT. Our
4 case has asserted claims based on various unfair and deceptive
5 misrepresentations and omissions of material fact in the
6 recruitment of students.

7 We found intense boiler room style call centers that
8 were lying to students about the true cost of the school, job
9 placement rates, the ability to obtain licensure, the transfer of
10 credits into the school, transfer of credits out of the school, other
11 false information about their programs and were also using
12 harassing and high-pressure recruiting tactics that have no place in
13 higher education.

14 In light of the recognition that there is an inherent
15 problem with for-profit schools that result in nearly all of the
16 consumer complaints that our states are receiving, Maryland and
17 other states pass various laws that place requirements on for-profit
18 schools.

19 Such laws included bond and guarantee fund
20 requirements, disclosure laws and prohibitions on enrollment of
21 students in career programs who would be unable to ever get the
22 licensure.

1 So why are schools making these conversions now?

2 One reason as some schools have openly admitted is they want to
3 convert to non-profit status to escape the stigma of for-profit
4 schools and recruit additional students.

5 However, for-profit schools have given themselves
6 the stigma by their own actions. Indeed it's not necessarily a bad
7 apple problem as it is sometimes a barrel problem when the
8 incentives of for-profit schools continue to result in bad conduct.

9 As well, we believed that some of these
10 conversations would serve to avoid and evade state laws designed
11 to protect students. Basically this is not about looking only at past
12 outcomes -- it's about looking at the history and understanding
13 whether students are going to be harmed in the future.

14 For-profit schools should not be given the benefit of
15 the doubt by their accreditor that a conversion to non-profit is good
16 for students or that it reflects nothing more than a tax status
17 change. The track record of the school should be analyzed and
18 specific structure of the deal itself, whether the non-profit has any
19 relationship with the existing for-profit and its investors should be
20 scrutinized.

21 It should not be assumed or trusted that meaningful
22 improvements indeed or that no improvements need to be made,

1 of yet unresolved crisis I believe we should all have front of mind
2 when considering this issue is the collapse of Corinthian College.
3 The collapse of Corinthian in 2015 was only the most visible and
4 notorious in a series of similar institutional calamities to befall
5 students and taxpayers, but it embodied many of the worst abuses
6 in higher education, further exposed the absurdities of a system
7 that burdened students and families with unsustainable debt for
8 credentials that are too frequently of minimal, personal or a social
9 utility and reflected a variety of other trends that afflict the higher
10 education system as a whole regardless of tax status.

11 Real higher education -- the kind that has made
12 America a truly great proving ground for achievements in all
13 sectors of the economy and in the entire range of human endeavor
14 can both prepare students for careers in a variety of fields and
15 contribute to the greater good.

16 Real higher education requires meaningful
17 investments and educators who are well prepared and supported
18 who have the standing as professionals and the freedom from
19 political interference that enable them to lead their students
20 through real ideas, however challenging those ideas might be.

21 Real higher education is readily accessible and real
22 higher education is truly accountable to everyone involved in

1 paying for it. Every element of accreditation should be considered
2 with an eye towards whether it advances real higher education or
3 allows phony imitations of it not only to exist, but also to profit
4 from taxpayer support.

5 This is the Corinthian test. Under current rules,
6 allowing an institution to convert from a for-profit to a non-profit
7 fails the Corinthian test. Accreditors are the only part of the three-
8 legged stool that looks deeply into a college's oversight structure
9 into matters like governance.

10 It is the governance structures, not the tax status that
11 makes a difference, especially in times of crisis. There is a
12 meaningful difference between the sudden and disruptive closures
13 of ITT Tech, Dade Medical College, the McNally Smith College of
14 Music and the orderly closure of institutions like St. Joseph's
15 College in Indiana and Mount Ida College in Newton,
16 Massachusetts.

17 The former would describe their cookie-cutter
18 curriculum, faculty composed entirely of temps and lack of student
19 support services as competitive advantages in their SCC filings.
20 While these characteristics may provide a larger profit margin to
21 investors, they are the exact opposite of the characteristics that
22 research shows lead to student success and educational

1 opportunity.

2 What we should learn from the collapse of
3 Corinthian and other schools like it is that accreditation does not
4 adequately deter actors with the motives and governance structures
5 of for-profit colleges. Their oversight structures will continue to
6 favor the personal enrichment of their boards, largely with
7 taxpayer dollars over the education of students regardless of the
8 technicalities of tax status.

9 Accreditors must assault the legislative and policy
10 earth that allowed Corinthian Colleges to exist, that must include a
11 deeper analysis of governance and incentive structures. Checkbox
12 accreditation reviews should not be sufficient considering the harm
13 we've seen done to students and taxpayers in recent years.

14 On behalf of the largest unionized instructional
15 workforce in American higher education I have three requests of
16 NACIQI. One is that NACIQI recommend that the Secretary place
17 a moratorium on federal approval of conversions to non-profit
18 status until the Education Department's procedures can be updated
19 to reflect the unreliability of IRS determinations.

20 Two -- inform accreditors that in its reviews
21 NACIQI will carefully examine whether accreditors are reviewing
22 non-profit colleges and conversion requests thoroughly, paying

1 special attention to governance and three -- recommend that
2 federal student aid make public all requests for pre-acquisition
3 review and establish a process for input.

4 CHAIRMAN KEISER: Thank you, questions --
5 thank you very much. Now, I'm going to Tim Powers, the
6 Director of Student Aid Policy at the National Association of
7 Independent Colleges and Universities.

8 MR. POWERS: Thank you so much, good morning
9 everyone. My name is Tim Powers and I'm here today to speak on
10 behalf of the National Association of Independent Colleges and
11 Universities.

12 NICU advocates on behalf of the Presidents of the
13 nation's private non-profit colleges and universities. The NICU
14 membership believes that the non-profit model of higher education
15 is the best model for serving students and the public interest.

16 Virtually every data point indicates that non-profit
17 colleges and universities best prepare our students for life beyond
18 the classroom from graduation rates and loan repayment statistics
19 to employment and civic engagement outcomes.

20 The foundation for those superior outcomes is the
21 mission-based philosophy of our institutions. As you know non-
22 profit colleges and universities are governed by a Board of

1 Trustees bound by a legal and fiduciary responsibility to fulfill the
2 mission of the non-profit institution of higher education. While the
3 mission statements of our colleges and universities are as diverse
4 as the institutions themselves, the Board is responsible for ensuring
5 through proper governance that the institution meet that stated
6 mission.

7 At private non-profits there is no profit-making
8 motive. There are no shareholders. There is no conflict between
9 meeting educational and profit-making objectives. Any surplus
10 remains invested in the institution itself, not withdrawn to pay
11 investors.

12 NICU has always been supportive of expanding the
13 non-profit model as the best means to improve access, opportunity
14 and success for the nation's college-going students. As such, we
15 believe that institutions seeking to legitimately convert from for-
16 profit status to non-profit status, should be cautiously welcomed,
17 not mechanically condemned.

18 However, such conversions must be genuine and
19 closely monitored by the federal government. Mechanisms must
20 be in place to identify and prevent any institution seeking to
21 convert from for-profit to non-profit as a means to skirt regulations
22 or to utilize its newly found non-profit status, simply as a corporate

1 shell.

2 Moreover, existing private non-profit institutions
3 must carefully comply with IRS rules and regulations in order to
4 maintain their non-profit status. The federal government has the
5 tools to insure compliance and should utilize those tools to dutiful
6 enforce federal tax laws, rules and regulations.

7 At NICU, we are acutely aware that no two colleges
8 are the same. Every institution that seeks to convert from for-
9 profit status to non-profit status must be scrutinized on its own
10 merits. We ask that the federal government ensure that this is done
11 in order to maintain the integrity of the federal student aid
12 programs, thank you for your time and I'll be happy to answer any
13 questions.

14 CHAIRMAN KEISER: Thank you, Simon?

15 MR. BOEHME: I'll make this a great question. So
16 I guess why do you find this trend concerning or why -- I
17 understand, you know, this corporate structure and things but dive
18 deeper into what is genuine.

19 MR. POWERS: Well that's a conversation that we
20 need to all think about together and I think for our members the
21 traditional model is one that as we've seen recently is changing
22 and so we would be willing and able to have those conversations

1 among our membership to really dive into what is a genuine non-
2 profit conversion, but we are just not capable at the moment for
3 making that determination right now.

4 MR. BOEHME: And do you think accreditors are
5 up to address some of these and make the assessments if it's a
6 genuine conversion?

7 MR. POWERS: Accreditors should of course play
8 a role in determining the status.

9 MR. BOEHME: But can they do it?

10 MR. POWERS: I think they can when they look
11 holistically at the institution.

12 CHAIRMAN KEISER: Thank you the next
13 speaker up is Gary Steinke, I hope I get that correctly, President of
14 the Iowa Association of Independent Colleges and Universities.

15 MR. STEINKE: Mr. Chairman before I sit I had
16 some -- because then you'll start the clock. I had submitted some
17 written comments that didn't get into the --

18 CHAIRMAN KEISER: The written comments
19 need to come by a specific date, is that correct?

20 MS. HONG: Yes.

21 CHAIRMAN KEISER: So please hold those, thank
22 you.

1 MR. STEINKE: I will, thank you. Good morning,
2 my name is Gary Steinke. I've spent a lifetime -- 30 some years in
3 higher education leadership in Iowa with public and not-for-profit
4 institutions. This will be the least academic presentation that
5 you'll hear today.

6 My son Tyler is 21 years old and he was born with
7 autism. And since that time Tyler is intellectually disabled and
8 since that time my spouse and I have been very hardworking
9 advocates with those people with intellectual and physical
10 disabilities in the State of Iowa.

11 I've been on the Board of Special Olympics Iowa
12 for as long as I can remember and about -- in about 2008 dozens
13 and dozens of parents and athletes themselves, were coming to me
14 and telling me that Ashford University and Kaplan University in
15 Iowa were making contact with them to convince them that they
16 could get a college degree and would like to come to their house
17 with a laptop computer and fill out the FASFA.

18 And they were telling these parents and these
19 athletes that it could be as much as \$12,000, \$6000 from the PELL
20 grant plus the money from the Iowa Tuition Grant which would
21 total about \$12,000.

22 And they were convinced that that meant that that

1 money was going to be in their pocket and so as best I could and as
2 often as I could I explained to them that wasn't going to be their
3 money ever and did they really believe that their son or daughter,
4 like my son, would be able to graduate and get a 4-year degree
5 from one of these institutions?

6 And of course, we all realized that that wasn't going
7 to be the case. I must tell you that this conversion issue from a
8 very non-academic point of view is deplorable. It is sick what they
9 did in Iowa. And in the strongest possible terms I would ask you
10 to make a recommendation that profit margins are not important
11 enough to take advantage of the least of our citizens.

12 Profit margins are not what higher education is all
13 about and maybe this didn't happen across the country -- maybe it
14 didn't happen with every private college, it doesn't matter. If it
15 happened once, it is a deplorable and sick practice and I can't
16 believe I finished early Mr. Chairman.

17 CHAIRMAN KEISER: Neither can I but that's
18 okay. Thank you for your very heart-warming, very important
19 message, yes heart-felt, any questions? The next presenter is Liz
20 King, Director of Education Policy, the Leadership Conference on
21 Civil and Human Rights.

22 MS. KING: Thank you. My name is Liz King and

1 I am the Director of Education Policy for the Leadership
2 Conference on Civil and Human Rights in Washington, D.C.

3 We are a coalition charged by our diverse
4 membership of more than 200 national organizations to promote
5 and protect the civil and human rights of all persons in the United
6 States. Through advocacy and outreach to targeted constituencies
7 we worked toward the goal of a more open and just society -- an
8 America as good as its ideals.

9 The civil rights community has long recognized
10 equal educational opportunity as central to our struggle to achieve
11 equality for all Americans. It is in that spirit that I offer the
12 following remarks regarding the civil rights community's priorities
13 in the reauthorization of the Higher Education Act -- the
14 importance of robust oversight of post-secondary institutions and
15 the need to protect students from exploitation by for-profit colleges
16 including for-profit colleges masquerading as non-profit.

17 The Higher Education Act was first passed in 1965
18 during the height of the civil rights movement and response
19 demand from low-income communities and communities of color
20 that the federal government do more to open the doors to higher
21 education and enable students to attain the education and degrees
22 they knew would mean economic social and political opportunity

1 in the United States. While some challenges remain the same, new
2 challenges have arisen in the 50 years since the law was first
3 passed.

4 The fundamental desire of communities, however,
5 and the obligation of the federal government to assist remain the
6 same. It is in this spirit that we offer the following principals that
7 must be included in a reauthorization of the Higher Education Act
8 and inform higher education policy more broadly if we're going to
9 strengthen and build a higher education system that provides
10 equitable access to and success in a high-quality, post-secondary
11 education for all students, especially for those students who have
12 historically experienced and continue to experience barriers to
13 success in higher education.

14 I would like to share a few of our priorities for the
15 reauthorization of the Higher Education Act which are more
16 broadly applicable in decisions regarding higher education policy
17 including the work of this body.

18 I am happy to provide the full document to the
19 members of this Committee. We call for higher education policies
20 that remove barriers to enrollment and promote meaningful access
21 for historically marginalized students including students of color,
22 native students, low-income students, English learners, students

1 with disabilities, adult learners, pregnant and parenting students,
2 opportunity youth, immigrant students, LGBTQ students, homeless
3 students, youth in or existing foster care currently incarcerated
4 individuals and individuals who have had prior contact with the
5 justice system including by providing for quality educator
6 preparation so that students are prepared for success after K-12 and
7 address barriers and access to a post-secondary education caused
8 by historic and present day race-based exclusionary policies and
9 practices.

10 Make college affordable for low-income students --
11 design accountability system to ensure that students receive value
12 from their higher education, exclude for-profit colleges including
13 covert for-profit colleges masquerading as non-profit from federal
14 financial aid programs unless they have demonstrated their value
15 to students through increased student owning --

16 CHAIRMAN KEISER: Please try to wrap that up.

17 MS. KING: Yep, protect student loan borrowers
18 from abuse of fraudulent practices and exploitation in the federal
19 and private student loan servicing and debt collection. I appreciate
20 the opportunity to share these remarks today and urge this body to
21 hold of central importance, the fair treatment of all students in our
22 higher education system, thank you.

1 CHAIRMAN KEISER: Thank you, thank you very
2 much. The next is Eric S. Juhlin, President and CEO of the Center
3 for Excellence in Higher Education.

4 MR. JUHLIN: Good morning. My name is Eric
5 Juhlin, I'm the President and CEO of CEHE, that's the acronym
6 we use. We have 16 colleges in the western United States as well
7 as an online college.

8 Looking at the list of folks talking today I think I'm
9 the only one who is actually a senior executive of an institution
10 that has gone through this process that was prior a for-profit
11 proprietary institution and then converted over or through a
12 transaction became emerged into a non-profit -- an existing non-
13 profit.

14 I don't know if that makes me the bravest speaker
15 or the dumbest speaker to come here because I'm the only one
16 that's actually been through that that's here to testify. But I think
17 there are two questions facing NACIQI. The first one is should
18 this organization provide policy recommendations to the
19 Department of Education relative to its review of change of
20 ownership processes.

21 The second question I think is should NACIQI
22 modify how it assesses accrediting bodies and those accrediting

1 bodies' review of institutions that undergo a change of control or a
2 change of process. From my perspective the answer to question
3 number 1 is an unequivocal no.

4 I think the Department of Education has an
5 extremely strong, robust and thorough and comprehensive process
6 for the review of institutions that are undergoing a change of
7 ownership or control.

8 Moreover, in the specific instance where an
9 institution is going from a proprietary ownership structure to a
10 non-profit ownership structure, they're inherently bringing into
11 play another layer of oversight, scrutiny and regulation from the
12 Internal Revenue Service.

13 Now we've heard comments already today and
14 you'll likely hear more from those who argue that the IRS is under-
15 funded, under-staffed and should be disregarded. I don't agree
16 with that perspective.

17 From my perspective the IRS does an exceptional
18 job in analyzing the organizational structure, the control structure,
19 the governance, the operations and any issues related to improper
20 inurement for non-profit institutions.

21 We've seen that first-hand and the IRS has decades
22 and decades of experience conducting those reviews. My answer

1 to the second question is maybe. And to explain that I'd like to use
2 the example -- the impressive work that NACIQI has done with
3 respect to outcomes recently.

4 NACIQI has shown that rather than approach that
5 work on outcomes from a political or ideological basis, it has
6 approached it from an objective, rational and empirical
7 perspective. Not only do I think that is right, I believe that is just.

8 I would encourage NACIQI to follow the same
9 approach when assessing accreditors on how they conduct their
10 reviews and the comprehensiveness of their reviews of institutions
11 changing ownership.

12 I'm unaware of any empirical objective data
13 indicating that institutions that went from proprietary structures to
14 non-profit structures experienced a degradation in education
15 quality, student learning or outcomes.

16 This Commission can and should look at the data
17 for those institutions that have previously gone from a for-profit to
18 non-profit status, analyze that data on an empirical basis and then
19 see what the data tells you -- if it indicates to actions are warranted
20 then you can move forward with those actions.

21 CHAIRMAN KEISER: Please wrap this up.

22 MR. JUHLIN: Sure, don't accept or take action

1 based on political ideology or influence or hyperbolic opinions.
2 Remain objective, look at the data and then decide if action is
3 needed, thank you.

4 CHAIRMAN KEISER: Thank you very much, any
5 questions, thank you Eric. The next person would be Tariq Habash
6 and hopefully I get Tariq right -- is that right Tariq? Tariq --
7 excuse me, Senior Policy Associate the Century Foundation,
8 welcome.

9 MR. HABASH: Good morning, Mr. Chairman,
10 members of the Committee thank you for the opportunity to testify
11 today. Dating back to the original GI bill, we've seen abuses of
12 students and taxpayers occur almost exclusively at for-profit
13 colleges.

14 After each regulatory crackdown in the '50's the
15 '70's, the '80's and in the '90's we saw for-profits reform but then
16 reinvent themselves to circumvent regulatory oversight to grow the
17 flow of taxpayer dollars.

18 This pattern of abuse is the result of incentives that
19 for-profit colleges have -- incentives that are blunted by the
20 regulations that apply to non-profit entities. This is very much
21 today's issue as the latest act of elicited reinvention now comes in the
22 form of non-profit conversion.

1 We are now seeing a trend where for-profit colleges
2 want to apply a non-profit label without properly separating the
3 profit from corporate control. In some cases like the Center for
4 Excellence in Higher Education, the Dream Center and Grand
5 Canyon among numerous other recently announced conversions.

6 Proposed structure still allowed the former owners
7 to hold power over the decision-making of the institution. In some
8 cases former owners remain on the non-profit Boards, they
9 maintain properties and corporations that help provide services for
10 the institution, they charge the non-profits rent. Sometimes they
11 even allow family members and business partners to hold power
12 within the new non-profit.

13 These covert for-profits threaten to deceive
14 consumers who rightly view non-profits as safer and they
15 threatened to destroy the non-profit sector in the same way that the
16 for-profit sector has been sullied. Students already take eligibility
17 for federal financial aid as a signal that the government values the
18 degrees from schools that don't often produce good outcomes for
19 students -- allowing covert for-profits to mislead consumers
20 through marketing their newly minted non-profit status will allow
21 them to have long-term effects on the revered private, non-profit
22 higher education system in America.

1 The reality is that true non-profit and public
2 oversight is effective in reducing exploitation in education but the
3 non-distribution constraint, the restriction that makes non-profits
4 safer for consumers must be enforced. Accreditors and policy-
5 makers must not be complacent, thank you.

6 CHAIRMAN KEISER: Thank you for under 3
7 minutes, questions? Thank you very much. The next presenter is
8 Clare McCann, Deputy Director for Federal Policy of Higher
9 Education at the New America. That's the New America
10 Foundation right?

11 MS. MCCANN: We dropped Foundation.

12 CHAIRMAN KEISER: Oh you dropped
13 Foundation, okay, just New America.

14 MS. MCCANN: Thank you, good morning. My
15 name is Clare McCann. I'm just going to be brief here -- I'll only
16 take a couple minutes of your time. For-profit institutions have an
17 extensive history of engaging in financially motivated behavior
18 that has harmed students and cost taxpayers billions in wasted
19 financial aid dollars.

20 Decades of experience have shown that for-profit
21 colleges are more likely to engage in aggressive recruiting, less
22 likely to maintain quality and rigor in their academics and more

1 likely to shift spending from institutional expenditures to
2 marketing, recruiting and other areas and that's because they are
3 focused on their bottom line.

4 At many for-profit institutions students outcomes
5 are poor with disproportionately higher rates of student loan
6 default, high costs and poor workforce outcomes. As NACIQI has
7 discussed for years now, these are critical areas in which
8 accreditors need to be working, and these are also important areas
9 in which NACIQI should be involved.

10 In recent years a number of for-profit institutions
11 have converted or attempted to convert to non-profit status through
12 complex models like the ones you've heard about today. And in
13 some cases an institution may legitimately change its business
14 model to minimize that profit motivation so that it's operating as a
15 true non-profit.

16 But in other cases the conversion is nothing more
17 than smoke and mirrors where the college becomes a non-profit in
18 name only but its owners and investors continue to operate the
19 school motivated by profit. And given the financial and other
20 implications for students and policy-makers, those kinds of
21 illegitimate cases should set off alarm bells for regulators like
22 accreditors and the education department.

1 The key is having strong policies in place to assess
2 each case carefully, thoroughly and accurately. To its credit,
3 ECCSE is one accrediting agency that has taken a first step to
4 factor conversions into its policies by proposing to limit changes in
5 control that don't truly change the corporate structure of the
6 institution.

7 But assuming the trend of conversions continues,
8 this is an issue that will affect many accreditors, many institutions
9 and many students and it's not clear all accreditors have begun to
10 consider the right way to assess conversions.

11 This is well within the scope of NACIQI's
12 authority. Accreditors are required under federal regulations to
13 have and adequately implement policies for changes in the control
14 of their institutions and NACIQI is charged with a fairly broad
15 mandate under the law which includes a role in advising the
16 Secretary on specific accrediting agencies recognition.

17 So it's hard to imagine how this Committee can
18 effectively discharge that responsibility without considering
19 whether the Agency's policies are sufficient in this area.

20 Additionally, NACIQI is expected under the law to
21 advise and make recommendations to the Secretary of Education,
22 both on the standards that accreditors create and enforce, and on

1 the Department's own eligibility process for institutions. So I urge
2 all of you to take up this issue as an Advisory Committee of
3 experts on quality assurance and lend your expertise to agencies
4 and the Department, both in its own oversight of institutions and in
5 its oversight of accreditors, thanks.

6 CHAIRMAN KEISER: Thank you, other questions
7 --?

8 MS. NEAL: Could you answer for me what
9 percentage of the overall higher education delivery system is for-
10 profit?

11 MS. MCCANN: I believe they enroll about 10% of
12 students and account for about 30% of student loan defaults.

13 MS. NEAL: So when we look at the fact that the 4-
14 year national graduation rate is less than 40% and the admittedly
15 first-time full-time and the 6-year graduation rate is less than 60%
16 first-time full-time, do you agree that those students are not
17 disserved are largely in non-profit and public institutions that those
18 have not been abused by the system?

19 MS. MCCANN: I think it's absolutely important to
20 focus on the outcomes of students at all institutions but also
21 recognizing that there is a heightened risk in the for-profit sector of
22 seeing those kinds of poor outcomes and of seeing more than just

1 poor outcomes, also very aggressive recruiting behavior and
2 misrepresentations and other issues sort of on the front end of
3 enrollment.

4 I think it's very important to focus your review
5 where the risk is the greatest but to ensure that there's
6 accountability throughout the entire system.

7 CHAIRMAN KEISER: Any other questions --
8 thank you very much. The next person onboard is Brian Galle,
9 Georgetown University Law Center.

10 MR. GALLE: Thank you Mr. Chairman. I'm Brian
11 Galle, I'm a Professor of Law at the Georgetown Law School and I
12 teach courses on taxes and non-profit organizations. And I'm here
13 to explain why accreditors can't rely on the IRS to identify which
14 non-profit colleges are really acting like non-profits, which
15 colleges will have good governance.

16 And you can find more details in the written
17 submission that I sent to NACIQI. So every year IRS grants
18 501C3 tax exempt status to thousands of firms that probably fail
19 one or more of the key legal requirements for that status.

20 The reason is that the service just lacks the
21 manpower to scrutinize applications, they get more than 80,000 a
22 year and they lack the resources to litigate closed cases. And that

1 problem has gotten worse over time until 2010 the IRS was
2 denying hundreds of applications each year. In 2016 it denied 9.
3 Not 900, 9. Sometimes the IRS does catch up to organizations as
4 time and tax returns reveal that the organizations aren't really
5 charitable but revocations of exempt status are very rare and the
6 process takes many years.

7 A recent example that I think shows the IRS's
8 unreliability at the grant stage is the application of Grand Canyon
9 University which was recently awarded C-3 status. Now, when I
10 read the documents it looks like Grand Canyon is going to pay
11 about 48 million dollars a year in interest plus 50% of its gross
12 revenues to its for-profit partner.

13 It shares a Board and a CEO with that partner. In
14 short it seems to me Grand Canyon's totally indentured to and
15 controlled by a profit-seeking partner and has every incentive to
16 maximize revenues and not student success.

17 Its non-profit status in my view is just a mistake.
18 And existing law I think clearly establishes that -- there are IRS
19 private inurement rules that demand that charities be independent
20 of for-profit control. They effectively prohibit shared Boards and
21 they strongly frown on distributions that are based on a percentage
22 of revenues. And yet for now Grand Canyon is a tax exempt

1 organization.

2 An illustration of how long it can take the IRS to
3 detect excess private inurement would be the Center for Excellence
4 in Higher Education. In 2012 it acquired 3 for-profit colleges
5 using about 431 million dollars in funds that were lent to it by the
6 former owner of those colleges. He now serves as Chairman of its
7 Board and as I understand its documents he also chooses the other
8 members of that Board.

9 By my math, CEHE has made total payments of on
10 average about 65 million dollars per year to its Chairman. In my
11 view it faces serious legal questions about its exempt status, yet for
12 6 years it has retained it.

13 So what I'm suggesting is that NACIQI should
14 require accreditors to use their own judgment about a college's true
15 status -- a college that tells applicants it's a non-profit but acts like
16 a for-profit is misleading students and misleading other regulators.

17 Some day when the IRS comes calling, that college
18 may also have a crippling tax bill that will threaten its fiscal
19 viability. Accreditors should be able to take these considerations
20 into account in carrying out their mission to protect students and
21 other stakeholders and indeed you should demand that they do so,
22 thank you.

1 CHAIRMAN KEISER: Thank you, other questions

2 -- Frank?

3 MR. WU: Just a quick question. So I understand
4 you to be saying the IRS today, doesn't do a very good job
5 detecting these sham conversions and I understand you then to be
6 saying accreditors -- if asked to do so, could do a better job, is that
7 the statement?

8 MR. GALLE: That's correct.

9 CHAIRMAN KEISER: Kathleen?

10 MS. ALIOTO: In the two colleges that you
11 presented, what was -- do you know what the student success rate
12 was there and the loan default rate?

13 MR. GALLE: I have not closely studied those no
14 I'm sorry.

15 MS. ALIOTO: Well you know this whole
16 discussion is about governance.

17 MR. GALLE: Absolutely.

18 MS. ALIOTO: And money essentially and this
19 body has been working on trying to focus on student achievement
20 which has Anne points out we have a problem with student
21 achievement on all sectors of education -- that's why I'm asking
22 that question because I don't care what somebody is getting paid as

1 the Chief Executive of an institution if the result in terms of
2 student's is good.

3 MR. GALLE: That's why I would say outcomes
4 are certainly one important factor. Another important factor is the
5 expectations of the people who enroll at that school. We have lots
6 of evidence that consumers have different expectations about non-
7 profits and for-profits and you want to make sure that the promise
8 that is made is the promise that's kept.

9 Another factor to consider is there is a body of
10 regulations both at the federal level and at the state level that treat
11 non-profits differently than for-profits on the assumption that their
12 incentives and behaviors are different systematically.

13 And I think that an accreditor that's interested in
14 making sure that all the laws of the various jurisdictions that relate
15 to an institution are followed in their spirit as well as in their letter,
16 that accreditor should give some account to whether a non-profit
17 status is genuine.

18 MS. ALIOTO: Thank you.

19 CHAIRMAN KEISER: Thank you. Our next
20 presenter is Christian -- oh, oh --

21 MS. NEAL: In your review of the Higher
22 Education Act as it relates to accreditors, is there any mention of

1 governance anywhere in the statute vis-à-vis accreditors?

2 MR. GALLE: I'm an expert in tax law and
3 charitable organizations. I'm not an expert in the Higher
4 Education Act, I'm sorry.

5 CHAIRMAN KEISER: Okay, good, okay,
6 Christian Smith, Organizing Associate of Higher Ed, Not Debt,
7 please come forward, welcome.

8 MR. SMITH: Good morning everyone. I'm
9 Christian Smith, Organizing Association with Higher Ed, Not
10 Debt, which represents a coalition of consumers and advocates
11 representing student loan borrowers.

12 As the trend of for-profit colleges as undergoing
13 conversions continues we believe it is vitally necessary for the
14 student and student loan borrowers. As the trend of the for-profit
15 colleges is undergoing conversions continues, we believe it is
16 vitally necessary for the students and student loan borrowers that
17 NACIQI make sure the financial operations and the governance of
18 these schools are appropriate oversight by the accreditors and
19 ensure that these entities reflect the social welfare they profess.

20 One prominent example raising concerns around
21 conversions is that of the education management corporation or
22 EDMC which operated for-profit colleges including the art

1 institutions and Argosy University. You will hear and have heard
2 concerns with this particular purchase and it's particularly
3 problematic given how they're currently structuring their financial
4 situation through this process.

5 And I would like to highlight cases where these
6 schools engage in exploitative practices towards their students to
7 ensure that you all recognize that moving forward we have to be
8 absolutely considerate of how this will affect the students as they
9 make their conversion.

10 So for instance, they're pressuring students to take
11 out loans as well as deceptive marketing regarding the program
12 quality, credit transferability and graduates employability are
13 notable and need to be considered.

14 For instance, Elaine from California said that
15 Argosy University took advantage of the fact that she had little
16 financial support for her education. She enrolled because they said
17 they would help her financially -- advise her on how to take out
18 loans. However the cause of the school was putting her in
19 immense financial strain and as the grants and loans she applied
20 for couldn't keep up with the rising costs of her program, she had
21 to drop out.

22 And throughout the years she realized that the

1 degree she was studying for would be practically useless given the
2 lack of good accreditation for the school and she had to drop out
3 with \$40,000 in student loan debt.

4 Samantha from California told us that the Art
5 Institute of California and LA lied to her about their accreditation
6 status for years, and they had inflated the job placement rate -- the
7 rating is at like a 99% employability which is quite high.

8 Her financial aid officers were less helpful
9 explaining tuition costs but were very good at making sure that
10 they took out loans and helped her do so to pay off her enrollment.
11 When she could not afford to attend they called her mother and
12 pressured her to co-sign for high interest loans and even then, as
13 Samantha could not fully cover the cost of the program, they told
14 her she needed to get an extra \$10,000 to complete her degree and
15 the family had to take out of their retirement savings just to afford
16 her education.

17 Melissa from New Jersey was enrolled in a PSY
18 Cy-D program at Argosy University in Tampa and she told us that
19 after two and a half years of dealing with misleading information
20 regarding her applicable course work and credits from her previous
21 degree, she realized that the program was trying to make her take
22 more of their own courses to keep her enrolled longer to collect

1 tuition costs. She is now \$100,000 in debt.

2 Devon from Pennsylvania told us that his degree
3 from Art Institutes of Philadelphia utterly failed to open up job
4 opportunities for him, despite advertising as such. Where still he
5 said most colleges wouldn't accept his credits from the Art
6 Institute so he faced great difficulty continuing his education and
7 improving his chances of finding work.

8 Given the concerns we have with the practices of
9 EDMC's for-profit colleges and the concerns with how they are
10 financially structuring their conversions to a non-profit, we urge
11 NACIQI inform accreditors that with a recommendation of other
12 consumer advocates present here today and consider that there are
13 immense concerns from a lot of us who are concerned with the
14 student loan debt crisis that needs to be considered moving
15 forward, thank you.

16 CHAIRMAN KEISER: Thank you, Ralph?

17 MR. WOLFF: Just a comment. Given the concerns
18 that you raised, the institutions and all of these institutions are
19 regionally accredited and there are complaint systems so I would
20 urge that you advise your -- those who filed these complaints with
21 you that you prosecute them with the accrediting agency and see if
22 they can assist.

1 MR. SMITH: And certainly, and I want to make
2 something absolutely clear with this too. These reports can come
3 to us throughout the difference crisis we face with this industry,
4 from years lurking back to 2012 through the present day today
5 mainly because the debt burdens held by these students are still
6 committing great financial strain upon them to this day.

7 And even though the schools either have been shut
8 down or they're going through conversions right now because they
9 lost their accreditation, the effects still remain. And certainly we
10 are trying to tackle this with our coalition at different areas
11 regarding the regulation of the industry, the ways to redress the
12 borrower's complaints and of course, advocating for full relief for
13 these borrowers.

14 So I believe that given the issue at hand moving
15 forward we have to consider how will these institutions engage in
16 these predatory practices and make sure that when we are
17 considering how we are advising the accreditors, that they have to
18 consider the holistic picture because certainly if we are -- like what
19 was said earlier, just putting other labels on something or as I'd
20 like to put it, you know, changing the chassis of the car without
21 actually changing the engine, that's, you know, driving us to the
22 student debt crisis.

1 That to not consider the past practices and then also
2 not contextualize that with how the Boards are going to be run
3 through these new non-profits would do a great disservice to the
4 borrowers so I encourage you to consider this as you advise the
5 accreditors moving forward.

6 CHAIRMAN KEISER: Thank you very much.
7 Our next presenter is David Halperin, Attorney and Counselor,
8 welcome.

9 MR. HALPERIN: Thank you, members of the
10 Committee good morning. Mr. Gunderson and Carl Barney, Mr.
11 Juhlin's boss, have in the past charged critics with waging
12 ideological war on for-profit schools.

13 I don't know what ideology they were talking about
14 other than opposition to waste fraud and abuse but they applied, we
15 think everything should be non-profit. Secretary DeVos has
16 echoed that message saying it's unfair to judge schools based on
17 their tax status.

18 I agree with the Secretary. We can't measure
19 schools based simply on whether they are for-profit or non-profit,
20 that's not determinative of integrity or quality. Some predatory
21 schools were always non-profit like Wright Career College shut
22 down amid charges of fraud or Center for Employment Training

1 Chicago campus whose director has been indicted.

2 But today many of the most troubling non-profits
3 are those converted from for-profit. Many deals appear structured
4 to benefit not primarily students, but instead insiders at Kaplan
5 Perdue, Bridgepoint, Keiser, Ultimate Medical.

6 The other side of this coin is further abuse of
7 students and taxpayers. Many converted schools are using their
8 non-profit status as a shield to exempt them from laws to curb for-
9 profit abuses.

10 The conversions also free schools of the stigma that
11 their own bad behavior helped create. The result is that predatory
12 schools can deepen their abuses. Last week I published an article
13 sent to you about the new non-profit Dream Center Educational
14 Holdings which has taken over the EDMC's schools and is run by
15 Brent Richardson who is the former CEO of Grand Canyon.

16 The new enterprise seems to be trying to leverage
17 its non-profit assets to benefit a network of for-profit companies
18 run by Richardson, his family members and long-time associates.
19 Staff there tells me that ethics in compliance are worse than under
20 the for-profit owners.

21 There's heightened pressure to enroll student at all
22 costs. The company seems to be misrepresenting the accreditation

1 status of some campuses and evading compliance with regulations
2 -- schools driven by numbers act recklessly if no one is holding
3 them accountable.

4 In 2016 the Department did send a message
5 rejecting the bogus conversion of Mr. Barney's schools.
6 Unfortunately the DeVos Department has demonstrated by word
7 indeed that it is not concerned about predatory abuses.

8 Accreditors pick up this signal. In 2016 the Higher
9 Learning Commission rejected the conversion of Grand Canyon
10 into a cozy pair invented use for-profit and non-profit. In 2018
11 HLC approved the same deal. The fact that the DeVos Department
12 and the IRS have abdicated oversight does not prevent you from
13 acting. Indeed you have a duty.

14 For-profit conversion has become the defining
15 higher ed abuse of the DeVos era and it's happening right in front
16 of you.

17 CHAIRMAN KEISER: Please just wrap it up.

18 MR. HALPERIN: Accreditors can curve the
19 practice of corrupted non-profits. If they don't, you should curve
20 the accreditors.

21 CHAIRMAN KEISER: Thank you very much are
22 there questions -- thank you very much.

1 MR. HALPERIN: Thank you.

2 CHAIRMAN KEISER: The next presenter is
3 Douglas Webber, Associate Professor Department of Economics,
4 Temple University.

5 MR. WEBBER: Thank you Mr. Chairman for the
6 opportunity to speak here. My name is Doug Webber, I'm an
7 Economics Professor at Temple University. No school or sector
8 should be categorized as good or bad, you know, in some moral
9 sense.

10 Every school is comprised of people who are just
11 doing their jobs by responding to the incentives in front of them.
12 Theoretically the additional profit motives present at for-profits
13 have an ambiguous prediction about whether they will provide a
14 better education value for students.

15 There is greater incentive to seek out non-traditional
16 students who may be traditionally underserved by non-profits or to
17 spur innovation in the way that education might be delivered. Now
18 if the market for higher education were perfectly functioning, this
19 is where this would be the end of the story.

20 But unfortunately, the market is far from perfectly
21 functioning and is played by what economists call market failures.
22 A profit maximizing school will charge the highest price possibly

1 while minimizing expenditures on students -- well non-profits are
2 certainly not immune to these incentives. The lack of a personal
3 profit motive does insulate them from some otherwise tough
4 decisions.

5 For example, my Department regularly runs high-
6 quality classes that are capped at a low student enrollment. The
7 per student expenditure is thus very high and this is most definitely
8 inefficient from a profit perspective but increased one-on-one
9 instruction leads to significantly better outcomes.

10 As the Director of Graduate Studies of my program
11 I regularly counsel students not to enroll or apply to programs
12 when I believe it's not in their best interest. Now this undoubtedly
13 costs my school money but I believe it is best for those particular
14 students in the long-run.

15 It thus becomes an empirical question as to whether
16 the good or bad incentives win out. Your local cable television
17 provider faces exactly these same price and quality decisions in
18 their market. The difference here is that the government is not
19 providing loans for individuals to pay for cable, and choosing the
20 wrong provider does not have the potential to financially hamstring
21 you for decades.

22 Five-year loan repayment rates are more than 30

1 answering some of the data questions that have arisen around the
2 table today I did want to share some data that I just pulled from the
3 college board -- 4-year graduation rates for private non-profit
4 schools were 51%, 4-year graduation rates for private for-profit
5 schools was 14% so I hope that that answers Kathleen's question.

6 Now on to my testimony -- public, non-profit and
7 for-profit colleges all struggle with inconsistent quality and
8 outcomes however these challenges are greatest among for-profit
9 colleges whose students are less likely to see earnings gains, more
10 like to have unaffordable debt, and more likely to default on their
11 student loans.

12 For example, new analysis that we conducted two
13 weeks ago showed that 73% of schools where most students
14 borrow and few can repay are at for-profit colleges. There are, as
15 mentioned here today already, extensive differences in the goals,
16 governance and regulation between for-profit and non-profit
17 institutions.

18 These differences are not mere tax status. Strict
19 regulation of public and non-profit institutions is what defines
20 them as public or non-profit. Non-profit colleges can generally
21 only spend money on education or a charitable purpose.

22 For-profits can spend money on anything. And

1 non-profits compensation pay to top level decision-makers is
2 subject to a dense set of rules intended to protect charitable
3 interests. At for-profits, decision-makers can personally profit
4 from operations of the institution.

5 In some cases, for-profit executives can feel
6 enormous pressure to prioritize making as much money as quickly
7 as possible. They can, as Andrew Rose and CEO of Kaplan
8 Higher Education wrote, “Exploit the short-term opportunity for
9 profits that’s inherently in this model in a way that hurts students,
10 taxpayers and the entire industry.”

11 For these reasons, if for-profit colleges fully
12 converted to non-profit status, we would have greater confidence
13 that they would put students first. But we’re concerned that this
14 may not be the case and therefore these conversions allow for-
15 profit colleges to avoid consumer protections and gain a
16 trustworthy sheen while continuing to be run for the private benefit
17 of their owners and executives.

18 The Senators who wrote to NACIQI are right to be
19 concerned. I have some more new data to share. The default rates
20 of schools that convert from for-profit to non-profit are troubling.
21 Whether compared to non-profits or for-profits, Ed’s latest default
22 rates show 25% of borrowers from colleges recently converted

1 from for-profit to non-profit status have defaulted within 3 years of
2 entering repayment.

3 Among other non-profits the rate was less than 8%
4 which is less than one-third of the rate of converted schools.
5 Among borrowers from for-profit colleges, 15% had defaulted
6 which is also much lower than the rate of recently converted
7 schools.

8 For-profit colleges as the Senators wrote are
9 reorganizing themselves as non-profits then entering into third-
10 party contracts with for-profit entities often operated by individuals
11 in charge of the former for-profit college.

12 CHAIRMAN KEISER: Wrap it up.

13 MS. WANG: I will wrap up. These entities appear
14 to be taking advantage of opportunities to create a tissue-thin
15 veneer of non-profit and tax-exempt status that allows the for-
16 profit entity to continue to run and manage key operations of the
17 newly formed non-profit.

18 CHAIRMAN KEISER: Thank you.

19 MS. WANG: The Senators wrote to NACIQI.

20 CHAIRMAN KEISER: Thank you, thank you.

21 MS. WANG: TECUS concurs with the Senator's
22 recommendations that they wrote to NACIQI on, thank you.

1 CHAIRMAN KEISER: Questions?

2 MR. WOLFF: Not a question just a clarification.

3 Did I understand you say -- I was trying to track the data as you
4 were presenting it that the completion rate or the default rate was
5 greater with the non-profits that converted, is that what you --

6 MS. WANG: It is actually greater at recently
7 converted non-profit schools. And it's not the completion rate -- I
8 didn't calculate the completion rate. What we calculated was the
9 default rate -- a 3-year cohort default rate. It was 8% at non-profits
10 across the board, 25% at schools that had recently converted to
11 non-profit.

12 MR. WOLFF: Thank you.

13 CHAIRMAN KEISER: Thank you, Kathleen?

14 MS. ALIOTO: Do you and other people here think
15 that the principal reason for this is that people just want to make
16 money or is it the fact that educating people is a lot tougher than
17 some corporate thinkers might have thought and they wanted to go
18 into it because they didn't think public education was doing the
19 job.

20 But in reality it's a tough job for all of us. It's
21 tough and it's tough when you're working with people who have
22 been systematically excluded from the American pie to bring them

1 back into the fold or to allow them to be in the fold. I think a lot of
2 people go into education because they really want to improve the
3 lives of other people but it's so tough I just think these
4 corporations aren't doing that great a job, that's all.

5 MS. WANG: I think that it is quite tough. I think
6 that the data that I shared today speaks for itself.

7 MS. ALIOTO: Yeah.

8 MS. WANG: There are schools that do a very good
9 job of serving low-income students, of serving PELL students.

10 MS. ALIOTO: Yeah.

11 MS. WANG: Unfortunately, like I said the
12 completion rate at for-profit schools is just too low and
13 unfortunately based on the numbers we crunched last night, the 3-
14 year default rate at converted non-profit schools is exceptionally
15 concerning and the data I believe speak for themselves.

16 MS. ALIOTO: Thank you.

17 CHAIRMAN KEISER: Thank you very much.
18 Our next presenter is Yan Cao -- I hope I said that correctly, a
19 Fellow at the Century Foundation.

20 MS. CAO: Members of NACIQI, thank you for
21 this opportunity to provide comments concerning for-profit
22 institutions converting to non-profit entities in order to avoid

1 regulatory scrutiny. My name is Yan Cao, I'm a Fellow at the
2 Century Foundation. Prior to that I represented and reviewed the
3 experiences of hundreds of students who had been defiled by
4 schools like Corinthian and ITT.

5 I want to highlight what happens to students when
6 conversion from for-profit to non-profit status occurs. Wright
7 Career College was an early example of a covert for-profit college.
8 In 1994 its sole shareholder created a non-profit, sold all assets
9 from a for-profit college into the non-profit which he controlled as
10 a trustee.

11 After the conversion he continued to operate the
12 non-profit as a for-profit school and personally shared in the profits
13 -- profit driven practices cloaked with the non-profit label. The
14 patterns are familiar today and they proved disastrous for the
15 students.

16 According to representatives from former students
17 Wright Career College emphasized in its non-profit status and in
18 its marketing and recruitment materials and that evidence is before
19 you in testimony submitted by Mike Rice. He said that every
20 single business card printed by Wright Career College emphasized
21 two facts that were designed to put students at ease.

22 One was accreditation by ACICS. The second was

1 non-profit status. Non-profit status was not only a shield from
2 regulations as the owner admitted to the IRS, he sought that
3 conversion so that he would not have to comply with the 85/15 rule
4 which at the time applied to for-profit colleges.

5 The non-profit status was also used as a sword to
6 attract students and an additional sword above and over what other
7 for-profit colleges could use. I want to share the experience of one
8 student. She says I went to Wright Career College because I was
9 told by the admission's representatives that my credits from my
10 career college would be transferrable.

11 I was told that Wright was a not-for-profit school --
12 and not-for-profit school credits would be transferrable. My goal
13 was to become an office manager. It frustrates me that to get the
14 education degree that I wanted and needed to accomplish my goal
15 now cost me even more.

16 I had to go to another college to get an actual
17 college education rather than a repeat of high school education
18 which Wright called college level. Indeed the credits that she
19 obtained at Wright were not transferrable.

20 She says I repeated English to go to Comp 1, basic
21 math into College Algebra and a computer course at Tulsa
22 Community College so I could progress further into more

1 advanced courses.

2 When I was at Wrights and I was having questions
3 about my math I googled a problem to find out that we were at
4 junior high level in the college course -- we were at the hardest
5 part of the book. I was so surprised and disappointed that I was
6 spending this money just to get a lesser education than I thought I
7 was.

8 I did graduate with an Associate's of Applied
9 Science, emphasis in business administration but it means nothing
10 because I do not have the education to back it up. I urge the folks
11 around this table to say that one experience of my career college,
12 one experience of a student going over \$20, 000 into debt to get a
13 junior high level education is enough.

14 That these conversions allow colleges with a profit
15 seeking motive not only to continue to engage in the predatory
16 practices that we saw at schools like Corinthian and ITT, but also -

17 CHAIRMAN KEISER: Please wrap it up.

18 MS. CAO: But also to tell students that they are
19 non-profits in that recruitment process, thank you.

20 CHAIRMAN KEISER: Thank you, questions --
21 Anne?

22 MS. NEAL: Art, I just want to say I apologize that

1 I have to leave early today and before I do I just want to say how
2 distressing I find this overall conversation in so many ways. I
3 mean I think if we look at the national assessment of adult literacy
4 which the Department of Education issues periodically which
5 shows that students can't compute the cost of raw office goods,
6 that they are unable to compare editorials and here we are today
7 talking about fraud, abuse, governance, corporate structures, tax
8 status -- which are not words in part of the Higher Education Act
9 vis-à-vis accreditation.

10 And I think this underscores for me the problem
11 with the accreditation system that we have. It is a peer review -- it
12 was set up as a peer review system and it was designed to look at
13 educational quality and provide guarantors of educational quality.

14 The concept that faculty and administrators were
15 authorized by Congress to be determining focus of fraud, abuse
16 and interfering in the governance system of our colleges and
17 universities which are largely appointed by accountable governors
18 or are elected just underscores for me how far a-field accreditation
19 has now gone.

20 And I think in part because faculty and
21 administrators don't want to define quality so it's easier to go and
22 look at all of these other things and I do not feel that this is in fact,

1 what Congress intended nor do I think the faculty and
2 administrators are well-equipped to deal with these very
3 sophisticated corporate finance and other issues which just
4 underscores for me again why I hope Congress and other bodies
5 will look closely at this system and really rethink it.

6 Because I think our discussion today while
7 interesting and addressing important concerns, is nevertheless not
8 one that is central to accreditation, so.

9 CHAIRMAN KEISER: Thank you Anne, thank you
10 Miss Cao. The next presenter is Sean Marvin, Legal Director,
11 Veterans Education Success.

12 MR. MARVIN: Thank you. I'm Sean Marvin, the
13 Legal Director at Veterans Education Keys to Success. VES is a
14 non-profit dedicated to protecting and defending the integrity of
15 the GI Bill and other federal education programs for veterans and
16 service members.

17 VES was founded in 2013 soon after a Senate
18 investigation uncovered rampant fraud by a member of for-profit
19 colleges. Unfortunately this was just the latest surge in fraud
20 targeting GI Bill benefits and veterans and has occurred for
21 decades.

22 Since 2013, VES has been contacted by nearly

1 4,000 veterans and service members about various types of fraud
2 that they've encountered at their school. Nearly every complaint
3 that we have received has concerned a for-profit school.

4 Those veterans allege fraud concerning almost
5 every aspect of services that particular colleges claim to provide.
6 Those veterans have told us about how their school lied about the
7 true costs of its tuition, whether the GI Bill would cover the entire
8 tuition, whether the other schools -- or whether other schools
9 would recognize that school's credits, the quality of its programs,
10 its graduation rate, whether its graduates are eligible for certain
11 jobs, the career assistance that the school would provide, the
12 school's job placement rate and the likely future earnings of the
13 school's graduates.

14 These are veterans who have served our country,
15 earned education benefits in return for their service, many of
16 whom have entered the military in order to receive those education
17 benefits and who've been ripped off by schools that treat them as
18 just another way of making money.

19 Given the history of fraud in the for-private sector,
20 veterans organizations like VES are skeptical about whether efforts
21 by for-profit schools to convert to non-profit status are simply a
22 way for companies to avoid regulations that apply to for-private

1 colleges and still reap the financial benefits of for-profit
2 ownership.

3 Along with the other concerns that have been raised
4 today, it's also concerning the for-profit colleges that convert to a
5 non-profit status would in many cases place themselves beyond the
6 reach of Federal Consumer Protection laws governed by the
7 Federal Trade Commission and the transparency requirements in
8 federal securities laws along with recommendations already made,
9 NACIQI should require that any for-profit school that converts to
10 non-profit status publicly disclose for a certain number of years
11 after the conversion any law enforcement activity taken against the
12 school thereby better insuring that consumers can make informed
13 decisions.

14 Veterans who have sacrificed for country and have
15 used their hard-earned education benefits should be able to trust
16 that their college that is acting in the best interest of its students
17 and not simply its owner's, thank you.

18 CHAIRMAN KEISER: Thank you very much, are
19 there questions -- again, thank you very much.

20 MR. MARVIN: Also just to inform you your next
21 speaker, Mr. Kamin with the American Legion, informed me that
22 he was not able to make it due to illness. He has submitted written

1 comments and would ask that you consider those.

2 CHAIRMAN KEISER: Thank you for letting us
3 know. So we are now through the sign-up sheets. The first person
4 to speak on the sign-up sheets are Monica Owens, on behalf of
5 Indiana AAUP's -- I assume that's the American Association of
6 University of Professors is that right?

7 MS. OWENS: That's right.

8 CHAIRMAN KEISER: Glad I got that right.

9 MS. OWENS: Thank you very much.

10 CHAIRMAN KEISER: Welcome Monica.

11 MS. OWENS: Thank you, I appreciate it, thank
12 you for your time today. Yeah, so I'm here to deliver testimony on
13 behalf of the Indiana State Conference of the American
14 Association of the University Professors. We'd like to use this
15 time to address the regional accrediting process involving Purdue
16 University and Kaplan, resulting in the establishment of Purdue
17 University Global and to highlight that through the process faculty
18 and students were prevented from adequate opportunities to make
19 public comment to voice their concerns about Kaplan to the HLC
20 and to the Purdue administration.

21 To the best of our knowledge one single public
22 forum was hosted by the Higher Learning Commission at Purdue's

1 West Lafayette Campus in fall, 2017. The forum was announced
2 less than 48 hours in advance and hosted in West Lafayette,
3 hundreds of miles from other Purdue regional campuses.

4 In an effort to work with the HLC to create a more
5 accessible space for a public comment -- Purdue faculty and the
6 Indiana AAUP submitted a formal request to the HLC for an
7 online town hall which the HLC denied.

8 Purdue faculty and students also requested to
9 register for public comment at the HLC Board meeting in Chicago
10 and were denied and so as a last resort faculty and students began
11 reaching out to individual Board members which resulted in the
12 letter from HLC legal counsel ordering them to stop.

13 Our concerns about shared governance, academic
14 freedom and an accountability of Purdue Global which we
15 consistently attempted to share with the HCL are as follows. At
16 Purdue Global faculty appointments are contingent contact
17 positions without opportunities for tenure.

18 Courses are developed under the leadership of
19 subject matter experts, not faculty. Hiring and curriculum
20 decisions are made top-down by management not faculty. Purdue
21 Global is established as a public benefit corporation exempt from
22 open door laws and public records requests and it's Board

1 meetings and its minutes are not open to the public.

2 Kaplan has been the subject of multiple state and
3 federal investigations over misleading students and
4 misrepresenting job placement results. Even worse, Kaplan
5 historically uses mandatory arbitration forcing students to forfeit
6 their right to sue or join a class action to stand up for themselves.

7 We don't want this for our students. In light of
8 these concerns we ask that NACIQI implement the following
9 recommendations: As law professor Brian Galle shows in his
10 testimony regional accreditors should not presume the IRS criteria
11 alone are enough to prove that an organization has achieved true
12 non-profit status.

13 This occurred in the case of Purdue Global where
14 the HLC left determination of non-profit status up to the IRS. We
15 recommend the Secretary place a moratorium on federal approval
16 of conversions to non-profit status until the Ed Department's
17 procedures can be updated to reflect on the reliability of IRS
18 determinations.

19 We also recommend that NACIQI work with
20 accreditors to ensure that a robust inclusive process for public
21 input is established and all accreditation cases and the federal
22 student aid make public all requests for pre-acquisition review.

1 We recommend that NACIQI assess whether
2 accreditors are reviewing non-profit colleges and conversion
3 requests to ensure that college governance is not contaminated by
4 contract's promises to pay or real estate deals that undermine the
5 integrity of the non-profit.

6 Finally we recommend that NACIQI work with
7 accreditors to ensure that shared governance and academic
8 freedom are central to the accreditation process. Thank you for
9 your time.

10 CHAIRMAN KEISER: Thank you.

11 MS. OWENS: Yes?

12 MR. WU: So I have a question. My understanding
13 of Purdue just from reading is that a non-profit institution acquired
14 a for-profit institution, is that your understanding as well?

15 MS. OWENS: I'm not a legal expert so I don't
16 think I can really speak to that but Purdue University as far as I
17 understand set up an LLC and then Labatt Kaplan so -- but there
18 are other people here who can answer those questions in a much
19 more accurate way.

20 MR. WU: That's fine, I have a different question
21 then about your views. I understand your views are not only about
22 this conversion issue, but more generally about other types of

1 structures including LLC's, public benefit corporations, et cetera.
2 In other words, your views go beyond just conversion -- would that
3 be accurate?

4 MS. OWENS: So I'm here representing Indiana
5 State Conference of the AUPA and they're very concerned about
6 the entire accreditation process and the way that your governance
7 in academic freedom are not central to this decision and of course
8 everything that you just mentioned is a part of why academic
9 freedom and shared governance were not central to this decision.

10 MR. BOEHME: Thank you so much and I
11 appreciate your comments and I'm going to be quick because I
12 know we're running out of time but believe it or not we actually
13 meet twice a year and we often -- and I encourage people who just
14 come for the political hot topics, to also come to NACIQI because
15 we deal with the challenges of -- if I'm hearing you correctly, a
16 lack, of transparency and a lack of often times a complaint process
17 from accreditors.

18 HLC which I have many disagreements about and I
19 would again encourage some new people here to NACIQI to come
20 join us in part of this conversation is that what I have been fighting
21 for for the past 5 years is that accreditors are often not up to the
22 task.

1 And I think what I also find is concerning about this
2 conversation is that it's a struggle enough for an accreditor
3 yesterday to tell us how many actions they took against their
4 member institutions and yet we're expecting to have them do
5 fraud. I think defrauding students is a terrible thing -- I'm the
6 student member.

7 So if I'm hearing you correctly HLC through this
8 process was not transparent and they were not open to complaints
9 about this process -- is that correct?

10 MS. OWENS: That's correct.

11 MR. BOEHME: Okay.

12 MS. OWENS: Faculty opinions were completely
13 disregarded.

14 CHAIRMAN KEISER: Bobbie?

15 MS. DERLIN: Just a quick point. There are
16 procedures to act against you could say -- act against, or pursue
17 complaints with a higher learning commission and I would just
18 encourage you to pursue those with diligence and gusto.

19 CHAIRMAN KEISER: I'm curious, are you
20 suggesting that the recommendations that the other folks have
21 recommended about apply to Purdue University which is a public
22 university?

1 MS. OWENS: They apply to Purdue Online

2 Global.

3 CHAIRMAN KEISER: But Purdue Online Global

4 is part of Purdue is it not, which is part of their 501C3?

5 MS. OWENS: I'm sorry what is your question?

6 CHAIRMAN KEISER: Well there are suggestions

7 that there will be additional regulations and additional oversight to

8 for-profit non-profit conversions and I assume you felt that this

9 was one of those so should Purdue University, a public university

10 be held to the same kind of additional oversight as those that are

11 recommended for some of the other conversions?

12 MS. OWENS: I think the recommendation being

13 made is that first of all that the HLC or any accrediting body

14 should not be reliant on the IRS criteria alone to determine if an

15 institution is indeed a non-profit.

16 So that should have been the first roadblock to

17 Kaplan even being allowed to convert to a non-profit and become

18 part of Purdue.

19 CHAIRMAN KEISER: But it's Purdue that is the

20 non-profit that's in the issue. Is Purdue a non-profit or a public,

21 you know, I assume it operates under 501C3?

22 MS. OWENS: I think it actually technically does

1 but it doesn't need to because public higher Ed institutions
2 technically don't need to file for 501C3 but for some reason they
3 have. In any case I'm not qualified to answer these questions --
4 these are very specific legal questions that I'm not here to speak to.
5 I'm here to speak on behalf of faculty experience and you know,
6 shared governance and being really side-lined in this process in
7 order to prioritize for-profit institution which is Kaplan.

8 CHAIRMAN KEISER: Thank you very much.
9 The next speaker -- let me get my glasses, is Josh Lenes, is that
10 correct? Josh Lenes on behalf of Eastern Michigan AAUP which
11 is the same organization, welcome Josh.

12 MR. LENES: Thank you Mr. Chairman, members
13 of the Committee. I'm here to deliver testimony on behalf of the
14 AAUP Chapter representing the 600 faculty at Eastern Michigan
15 University, a public institution to shine light on a related issue of
16 importance to NACIQI -- private agreements entered into public
17 colleges and universities.

18 Since 2016 the administration and the Board of
19 Regents at Eastern Michigan University, a public institution, have
20 entered into agreements with several private for-profit firms to
21 provide services that were previously conducted by the university
22 and its employees.

1 These include dining services, the parking system,
2 much of the work of the benefit's office and online program
3 management. It's our view that these contracts with private
4 entities have negatively affected the university by undermining
5 shared governance, weakening revenues and shifting the focus of
6 the institution away from the public good toward private profit.

7 All the decisions to privatize were made without
8 consultation with faculty bodies despite the fact that the union
9 provides faculty the right to participate in institutional governance
10 including decisions about curriculum development and utilization
11 of resources.

12 Although the administration has justified
13 privatization as necessary given declining state appropriations and
14 a dip in enrollment we are concerned that privatization is
15 contributing to a financial crisis.

16 Since the concession on dining and parking entail
17 the university's foregoing future revenues in these areas for long
18 periods -- 13 and 35 years respectfully, in these operating budgets
19 for the foreseeable future it will be much more dependent on
20 tuition fees than it has in the past.

21 Privatization has also brought about a shift of the
22 focus of the institution away from the public good to the

1 maximization of profits of these entities. Decisions on operations
2 are no longer made with the need to the students and community in
3 mind. For example, food costs on campus have increased
4 dramatically although many of our low-income students cannot
5 afford to feed themselves.

6 The parking company has significantly reduced the
7 amount of handicapped parking spaces, increased ticketing of
8 students and members of the community and will undoubtedly
9 continually raise fees for the next 35 years, thus adding to student
10 debt.

11 In its recent review on reaccreditation of the
12 university the HLC appears to have been aware of just one of the
13 contracts. It certainly did not consider whether privatization is
14 undermining the mission and integrity of EMU. The oversight is
15 puzzling given that the mission of the HLC is to serve the common
16 good by assuring and advancing the quality of higher learning.

17 Given this, we're recommending to NACIQI that
18 regional accreditors closely review these agreements that non-
19 profit educational institutions enter into with for-profit companies
20 to better understand who is profiting from these agreements and to
21 ensure that shared governance, academic freedom and instructional
22 quality are not undermined by these agreements. Thank you for

1 your time, I'll be happy to share additional documents if necessary.

2 CHAIRMAN KEISER: Thank you very, very
3 much -- questions? It's hard to believe that we're at our last
4 presenter and that's Antoinette Flores for the Center for the
5 American Progress. I hope I got that Antoinette because it's not
6 clear here -- is it Antoinette, okay great thank you, welcome.

7 MS. FLORES: Thank you members of the
8 Committee for having me and thank you for taking up this
9 important topic. This isn't the first time that rapid change in
10 industry has threatened higher education and it's not the first time
11 accreditors were ill prepared.

12 A decade ago it was accrediting shopping when for-
13 profits purchased struggling non-profits and the regional
14 accreditation that came with it only to radically change the college.
15 Take for example Bridgepoint Education's takeover of Ashford
16 which was followed by rapid expansion online at a significant
17 profit only to later see the college itself shut down.

18 In retrospect the head of its accreditor, HLC,
19 expressed regret stating that the Agency had been hoodwinked.
20 It's critical that accreditors are asking the right questions and
21 adopting strong standards before these changes happen, not when
22 it's too late. But to date there are no clear standards or best

1 practices upon which these decisions are being made and there is
2 very little public transparency to ensure decisions are in the best
3 interests of students.

4 There is one exception -- ACCSU recently proposed
5 strong changes to its standards that would reject these types of
6 conversions if they are tainted by financial complex of interest.
7 The message to their membership is clear -- protecting students
8 and ensuring quality is paramount.

9 This is just a start but it's an obvious move and one
10 that others would be wise to follow. But where are the rest of the
11 agencies -- all over the place. To my knowledge no others have
12 published standards setting the rules for these decisions. Nowhere
13 is this confusion more clear than the conversion of EDMC colleges
14 to the Dream Center which required separate approval of 5
15 regional agencies.

16 Each came to a different decision for different
17 reasons and with varying concerns but little transparency into the
18 process. And another concern -- currently conversions are
19 considered substantive changes. You heard from the Department
20 this week who's considering deregulating substantive change,
21 requiring accreditors to do less -- a recommendation that NACIQI
22 has supported.

1 We are walking a dangerous line that requires bold
2 action. I encourage NACIQI to recommend strong protections for
3 students and that you consider the actions accreditors take in your
4 reviews.

5 In the meantime, the question for accreditors is
6 whether they're going to shape the change and prevent another
7 cautionary tale or stand idly by and let it happen, thank you.

8 CHAIRMAN KEISER: Thank you very much,
9 George you're up.

10 MR. FRENCH: Could you reference again
11 NACIQI's support of basically the relaxation of substantive change
12 with accreditors -- when did that occur, are you familiar with that
13 Miss Jen?

14 MS. HONG: There's some language in that -- my
15 laptop is dead so I can't work it.

16 MS. FLORES: I can mention it -- NACIQI issued
17 recommendations on the Department of Education's plans to
18 deregulate. One of those recommendations was to consider
19 substantive change and I believe NACIQI's language was in the
20 case of high-performing institutions but I'm not sure that we have
21 a definition of high-performing institutions. For example, would
22 Purdue be considered as a high-performing institution and just, you

1 know, not have to go through a review process? That's an open
2 question.

3 CHAIRMAN KEISER: Great, any other questions,
4 Bobbie?

5 MS. DERLIN: I just want to make sure I'm
6 understanding -- I think Antoinette, you're referencing our
7 language in support of a risk-adjusted strategy for accreditation
8 and I want to make sure I'm understanding that you are not in
9 favor of this because you think it's giving some institutions a buy -
10 - am I correct?

11 MS. FLORES: No, I'm absolutely for a risk-
12 informed decision but there was another part of the
13 recommendations that included substantive change and allowing
14 accreditors to waive through institutions if they were "high-
15 performing".

16 MS. DERLIN: Thank you.

17 CHAIRMAN KEISER: You folks are standing in
18 between us and a break but that's okay, Ralph and then Claude
19 because I may not last until the end of your presentation.

20 MR. WOLFF: As a member of the sub-committee
21 that worked on that Antoinette, just to say we never considered this
22 issue in preparing for the recommendations and the

1 recommendations dealt with more around un-substantive change --
2 the requirement that additional locations -- it was on a wholly
3 different set of issues with respect to substantive change.

4 But the sub-committee never engaged the question
5 about the conversion of for-profits to non-profits and its
6 relationship to substantive change.

7 MS. FLORES: Yet, can I respond to that -- no?

8 MR. PRESSNELL: Go ahead because I mean I
9 wrote it so he accurately depicted that.

10 MS. FLORES: You know I've done a lot of asking
11 agencies themselves what exactly they're referring to when they
12 say we need to roll back substantive change regulations and I
13 haven't heard a good answer and my concern is that the
14 Department is going to roll back regulations and provide broad
15 authority to waive conditions in the cases of institutions and I
16 would ask NACIQI and the Department to consider all of the
17 ramifications in where this would apply including it would apply in
18 these scenarios where accrediting agencies no longer have to look
19 at substantive change.

20 MR. PRESSNELL: Again, we never said that they
21 would no longer look at it so okay.

22 CHAIRMAN KEISER: And Susan?

1 MS. PHILLIPS: Antoinette you've looked at a
2 number of the larger agencies and their substantive change
3 policies. As you look at those what do you see in terms of
4 accreditor's capacity to address the issues that we're talking about
5 today?

6 MS. FLORES: So the issue that we're talking about
7 today falls under substantive change and there are very broad
8 guidance on where this falls. I think it falls in line with change in
9 ownership and as far as what the agencies themselves are
10 considering, or what the guidelines are -- that's not public and
11 there's no transparency into that which is a concern.

12 CHAIRMAN KEISER: Okay, thank you very
13 much Antoinette.

14 MS. FLORES: Thank you.

15 CHAIRMAN KEISER: We are at a very important
16 point because we're going to take a 10 minute break. We will
17 reconvene exactly at 11:15 -- exactly. We will have then a
18 discussion on this issue at which point we will finish that
19 discussion and then Bobbie Derlin will give a report on her
20 Committee on big data or whatever data it is and then we will
21 hopefully be able to adjourn and then get you guys to your
22 airplanes, thank you.

1 (Break 11:04 a.m. - 11:17 a.m.)

2 CHAIRMAN KEISER: Okay, we're going to get
3 started please. We have a deadline. Committee members please
4 take your seat. Okay, 1,2,3,4,5,6,7,8,9,10 -- we are back. If you
5 wonder why I'm counting is we are required to have a quorum to
6 be in session so we do have our 10 of 18 so here comes Ralph for
7 number 11 -- we're in great shape.

8 Okay we have some time set aside for discussion on
9 this matter. Anybody who would like to begin with it, Claude and
10 then Susan?

11 MR. PRESSNELL: Well first of all I think it was a
12 very important discussion, you know, that we're having and the
13 question was whether or not we can give it full due in a short
14 period of time that we have remaining.

15 But you know, there are some good for-profits and
16 there are some bad for-profits - there's no doubt about it. And I
17 think that what -- and there are good non-profits and there are
18 some bad non-profits, I get all of that. I think that what we have
19 heard today and what we've read through the submissions that
20 were given to us and what we read in the media -- we've got a
21 problem.

22 And we have a problem with really consumer

1 protection and protecting these students. There are institutions out
2 there that are predatory and there probably are some of them that
3 are using this game of switching from for-profit to non-profit as a
4 maneuver and we have got to look at it.

5 I think this is such a big discussion that our scope --
6 and our scope is rather narrow in that discussion because this is a
7 discussion that should include the IRS. It's a discussion that
8 should include state governments -- the whole triad and the
9 complexity of the triad, right?

10 I mean you should include FSA in how they audit
11 the student financial aid side of it. It should, you know, it should
12 look at state audits, it should look at all of these things. It should
13 look at IRS audits and I do believe the ball is being dropped and
14 maybe being dropped maybe simply because it's such a complex
15 issue.

16 And accreditors have a role in this too. And so I
17 mean I'm glad we're having it. I'm a little bit concerned that we
18 just have a very short period of time to address it and I know that
19 NACIQI has a small lane in which to address this.

20 I think we should address it and I think we ought to
21 have some careful thought put into what we recommend to the
22 Secretary on this so I'm not -- I didn't make all those comments to

1 say well it's somebody else's job -- no I think it's our job to do it
2 but I think it's also far more complex than just a discussion in this
3 room here today.

4 CHAIRMAN KEISER: Susan and then I'd like to
5 say a couple of things.

6 MS. PHILLIPS: Well I would absolutely echo that
7 very eloquent plea for attention broadly. We definitely do have a
8 problem and in many ways it's a failure of the triad and its many
9 manifestations.

10 I know that in our lane we do have the review of the
11 substantive change policy -- that's where that squarely lands and
12 I'm aware in the course of our discussions -- gosh for the last 8
13 years I don't believe I've heard anybody -- any of the staff or us
14 talk about how substantive change was handled, what the policies
15 are, whether there are any issues there.

16 And I wanted to at least have a quick update if we
17 could from the staff and maybe this is Herman, about what is --
18 what is seen there when substantive change is reviewed when the
19 staff looks at that, what is it that you look at and how -- how do
20 you see this issue in that review?

21 MR. BOUNDS: You know the regulations are
22 pretty -- I mean they're pretty non-descriptive. It just says that you

1 know, the agencies must have a policy for the approval of
2 substantive change and when we look at an example of an agency
3 applying a substantive change policy it's merely just to make sure
4 that they follow what they say they do and they give us
5 documentation whether its, you know, some may require site visits,
6 some may require a paper review, but it's really of the agency to
7 determine what that is and we don't really you know, we really
8 don't say well you haven't done enough.

9 It's their policy and how they -- you know how they
10 want to apply it and what they think is proper.

11 MS. PHILLIPS: So the -- just to clarify, the review
12 process only evaluates whether there is a policy and it is applied?

13 MR. BOUNDS: Where there is a policy and
14 whether it's applied.

15 MS. PHILLIPS: So in some ways this is similar to
16 the student achievement, you know --

17 MR. BOUNDS: Absolutely.

18 MS. PHILLIPS: How enough is enough?

19 MR. BOUNDS: Absolutely.

20 MS. PHILLIPS: And that threshold question isn't
21 something that is reviewed?

22 MR. BOUNDS: That's correct.

1 MS. PHILLIPS: By staff and it certainly hasn't
2 been reviewed in part of our conversations.

3 MR. BOUNDS: That's correct.

4 MS. PHILLIPS: Or our conversations here.

5 MR. BOUNDS: That's correct.

6 MS. PHILLIPS: Well there's a first point of
7 question -- an avenue for something in our wing that we could take
8 a look at more closely.

9 CHAIRMAN KEISER: I'm going to make a
10 comment then Brian, then Ralph.

11 Again I want to thank everybody for being so -- and
12 John, sorry, it's hard to keep you guys all -- just to thank
13 everybody for being so professional. This has been a very I think
14 important and very enlightening discussion.

15 I do want to remind people that this is not
16 something new. That institutions have gone from for-profit to non-
17 profit from non-profit to for-profit, from non-profit to public and
18 I'll give you a couple of examples.

19 One of our members who is not here to defend
20 himself but Southern New Hampshire University was founded in
21 1932 to A.B. Shapiro, it was a family-owned school. In 1968 they
22 went from for-profit to non-profit. Johnson and Wales University

1 is a very well-known institution based out of Providence, Rhode
2 Island was founded in 1914 and 1963 became non-profit.

3 Interesting the person from the Independent
4 Colleges and Universities from Iowa -- an institution called AIB
5 College of Business was founded in 1921. It became non-profit in
6 1941 and in 2015 became part of the University of Iowa system so
7 you had a for-profit become non-profit and then became public.

8 Then Baker College in Michigan there's somebody
9 else from Michigan here -- was founded in 1911 and it became
10 non-profit in 1977. And there are many, many instances where
11 institutions found to the benefit of their students to make that
12 transition from not-for-profit to for-profit.

13 That doesn't mean there may not be problems
14 within the system and we'll be glad to discuss that. I'd be glad to
15 answer any questions if anyone had about ours and I can tell you
16 that I'm very comfortable in the discussion and, you know, I think
17 certainly what we did was appropriate, effective, with the whole lot
18 of legal counsel, a whole lot of money spent to do it right and we
19 did it right.

20 And for 8 years we've been operating in a non-
21 profit. In fact, the non-profit has been operating since 2002 and we
22 with Keiser University under that non-profit since January 2011 so

1 I just wanted to bring that attention and Brian you're up.

2 MR. JONES: Thank you Art for that history and I
3 agree that today's conversation was really illuminating and I
4 commend all of the speakers today. I learned a great deal.

5 And, you know, again I certainly have the view as I
6 said before that you know, governance matters and I do think that
7 we have to be cautious about conversions where there might be a
8 lack of transparency or where governance can create incentives on
9 the interest of students so I certainly agree with all that.

10 I do think thought that there was an important
11 element missing in today's conversation and it kind of gets to
12 Susan to your point and I do think that we did not really hear from
13 the Department. We haven't, of course, heard from the regional
14 accreditors who are in fact, reviewing these things today.

15 I can't speak to the process of conversion. I've not
16 gone through one. When I was at the Department I wasn't
17 involved in any but I am currently in the midst of a change of
18 control process as folks around this table may know.

19 Our parent company, Strayer Education is merging
20 with the parent company of Capella University, Capella Education
21 and we have been going through a pretty rigorous process but with
22 the Department and with Capella's accreditor HLC and the rigor

1 that has been brought to that change of control process, that sums a
2 change I think really could be instructive to us as we think about
3 what our recommendation might or might not be and how we
4 might improve those processes.

5 And you know, I have nothing but high regard for
6 the folks at the Department who have put us through our paces and
7 the folks at HLC who have done that as well. And I do think
8 before we get to some place of making some decision about what
9 to do with what we heard today, it would be useful for all of us I
10 think to better understand the nuts and bolts of what is in place
11 today at the Department.

12 MR. ETCHEMEDY: That's fine, let me say a few
13 things. I agree with the final point that Brian was making. I think
14 that what we have here is certainly a failure of the triad and Claude
15 is very eloquent about how this really should be a discussion being
16 had at the broader level involving more participants.

17 And Anne really in effect said a similar point. She
18 said that basically this is not something that accreditation should be
19 doing or that the accreditors should be doing, that they're not really
20 equipped and I actually agree with that as well.

21 However, we have a failure of the triad and if
22 nobody else is doing something we need to figure out what we can

1 do if anything to try to fix this -- improve the situation. I think if
2 nothing else it's a consumer protection issue, it's a transparency
3 issue, advertising yourself as a non-profit when in fact you're
4 actually a for-profit structure is a failure to the students.

5 Now I think that NACIQI is not just focused on
6 accreditation. NACIQI is -- as I understand it, a National Advisory
7 Committee on Institutional Equality and Integrity. If this isn't the
8 integrity issue, I don't know what is.

9 So I would hope that we would do something. I
10 don't think that we're prepared to figure out in the next 20 minutes
11 what that something should be and -- how many, 10 -- worse! So I
12 would actually suggest that we form a sub-committee to look at
13 this and produce a white paper recommending the appropriate
14 actions for the appropriate actors, whoever they may be, so.

15 CHAIRMAN KEISER: Ralph?

16 MR. WOLFF: Thank you. I would echo that there
17 would appear to be a problem though I don't want to start off by
18 saying there is as much as I'd like to understand for example, there
19 is a case with the Dream Center that the regionals to have taken
20 different actions.

21 And it's not clear to me on what basis is it
22 inconsistent application. I've been one who has actually

1 implemented change of control policy when I was President of
2 WASC. The law requires that there be a follow-up visit within 6
3 months.

4 But I would say that the follow-up visits typically --
5 and I can't say what it would be in the Dream Center case or in the
6 Grand Canyon University but typically our very narrow and very
7 narrowly focused and they may not be as substantive as maybe
8 required.

9 So I'm very interested in more information to
10 ascertain what is the nature of the problem and what might we
11 address in our narrow role in the application of inquiry with
12 accrediting agencies with respect to their application of the
13 substantive change process that would seem to be our remit.

14 So I would support the idea that we gather more
15 information and try to understand how is this being approached? I
16 would say that I appreciate the presentations that were made and
17 they raised for me real questions about interlocking directives
18 about follow-up information about the specific -- about data --
19 whether these are looked at by accreditors after a change of
20 control.

21 I think there are issues for us to look at but I don't
22 want to start with there's a problem to be fixed I'd rather start with

1 what are we looking at? What is the nature of the problem? How
2 much of this is accurate?

3 I do know that there are committees that review this
4 as part of the substantive change at WASC -- it's called structural
5 change to give it even more review. And so I think an inquiry, if it
6 can be done, with some of the accreditors of how they've
7 addressed it as part of a sub-committee I would endorse the view
8 and come back and report and even talk with the Department.

9 But just having a policy is not enough. I mean
10 having a change of control policy. I think we should expect more.

11 CHAIRMAN KEISER: Bobbie then -- no I'm
12 sorry, Simon, then Bobbie, Bobbie?

13 MS. DERLIN: I'm first, okay. I want to echo the
14 remarks of my colleagues. I think it is important that because of
15 time limitations and also because we have a lot of members who
16 are unable to be here at this time, that we establish a means to
17 continue this conversation, that we specifically explore our prior
18 recommendations on substantive change policy and how we might
19 want to consider changes to those policy recommendations for the
20 future.

21 I think we should include opportunities to hear from
22 others about accreditors. I do think there is -- I do think this is

1 specifically related to what we talked about as our lane or the
2 narrow lane. I mean substantive change is part of the accreditation
3 regulation.

4 And I think we need to learn more. And I don't
5 think we have enough time to do that today, but I think we should
6 have a definite plan, whether it's a sub-committee or some other
7 strategy I think there also needs to be a plan for us to have a whole
8 group conversation about the topic in general, thank you. Oh and
9 thanks to all these presenters and people who sent us material it
10 was very helpful.

11 CHAIRMAN KEISER: Simon?

12 MR. BOEHME: Thank you Chair and thank you to
13 the speakers today for your advocacy, particularly for standing up
14 for students. I think one of the core elements of NACIQI is to
15 protect students and often times when we look at the triad, we see
16 everyone pointing fingers at each other and guess who's left
17 behind -- students.

18 I think it's through these kinds of comments and
19 through your ideas and through your research that we're able to
20 make the system better so students can really have a fair shot to get
21 to the American pie as my colleague, Kathleen says, and I
22 appreciate that. And I could not agree more with Claude's

1 statement that this is an issue.

2 But to me and our role in NACIQI is that it is so
3 important that accreditors be transparent and so there are all sorts
4 of corporate ownership issues from for-profit to non-profit, non-
5 profit to whatever it is -- we need to have a better understanding of
6 the complexities of what accreditors do.

7 I give accreditors a hard time and I'm very over
8 simplistic but they do have a very hard job. I think when they're
9 looking through these conversions I don't think they're equipped.
10 I tend to agree with John -- I'm not sure if it falls with the
11 accreditor's responsibility.

12 I think this is a failure of consumer protection.
13 Primarily there should be statutory changes again in higher
14 education to protect students and I think accreditors and the
15 Department and state government should be given greater authority
16 to protect students in that kind of way.

17 But I really resonate with Ralph as well and Bobbie
18 that we need to learn more. I think having experts come before
19 NACIQI to give us a better understanding and it sounds like there
20 was some research being done. I would like to have more
21 information to better understand that because while I give
22 regionals a hard time and I often times think that they may not be

1 up to the challenge, I think there is this real effort now being done
2 and we saw it in the WASC presentation -- Northwest is getting a
3 new leader and people are sitting and listening to NACIQI.

4 I would like to have that kind of transparency so we
5 can ensure that students are protected.

6 CHAIRMAN KEISER: Frank?

7 MR. WU: I'm going to make a motion. It is that
8 NACIQI set up a sub-committee pursuant to the statute in the
9 regulations to look at the issue of substantive change, including but
10 not limited to conversions of institutions from for-profit to non-
11 profit status.

12 I want to mention two aspects of the motion. One
13 it's directly tied to the statute regulations so it's expressed. And if
14 the sub-committee determines that actions should be taken that are
15 beyond the scope of what NACIQI could do, it should go ahead
16 and say that recognizing NACIQI's limits.

17 In addition it's not just about the for-profit
18 conversion issue but it's more broadly about substantive change,
19 that's my point.

20 CHAIRMAN KEISER: So there's a motion, is
21 there a second? Second by George French -- further discussion,
22 Bobbie?

1 MS. DERLIN: Frank, is it possible that you could
2 also include in this motion that there will be a future opportunity
3 for the full Committee to learn from accreditors and others on
4 these issues of substantive change?

5 MR. WU: Sure I would think that when the report
6 was done as with the report you're presenting today that there
7 would be a NACIQI meeting where this would be presented and
8 the Chair and the staff would determine that we would put it on the
9 agenda, there'd be discussion.

10 MS. DERLIN: And we think that too -- I just don't
11 want anyone to forget.

12 MR. WU: I hear you. We're on the same side so if
13 you -- I'll add with the understanding that the matter shall be
14 returned to the NACIQI agenda period.

15 CHAIRMAN KEISER: Any other discussion?
16 Sensing none, all in favor of the motion raise your hands -- all
17 those opposed, the motion passes.

18 **NACIQI RECOMMENDATION**

19 **NACIQI set up a sub-committee pursuant to the**
20 **statute in the regulations to look at the issue of substantive**
21 **change, including but not limited to conversions of institutions**
22 **from for-profit to non-profit status.**

1 CHAIRMAN KEISER: There will be a sub-
2 committee. Jennifer and I will work on getting that appointed,
3 okay --

4 MR. FRENCH: I have a general question to you. I
5 may have missed it but why is it that we're only having one
6 meeting this year?

7 CHAIRMAN KEISER: We didn't we had two
8 meetings this year. We had the meeting in February and then the
9 meeting in May. If I'm not mistaken and Jennifer could probably
10 address better but our budget only allows for two meetings a year
11 so we're going to have it at the beginning of next year and then
12 move the second meeting closer to August/September so we spread
13 out.

14 We've got because of conflicts in December that's
15 what messed it up, okay? We have one more item on the Agenda
16 and I will turn the microphone over to Bobbie.

17 **SUBCOMMITTEE ON DATA**

18 MS. DERLIN: Well, a tough action to follow. This
19 is a report of the NACIQI sub-committee on data. And this
20 Committee was established at our last meeting and we have had
21 one telephone conference call with the members present included
22 me, Claude, Ralph and Jennifer. One of our members who had

1 previously volunteered was unable to participate so we sought
2 some additional members and Paul LeBlanc and Federico
3 Zaragoza have agreed to participate in the telephone calls after this
4 meeting.

5 We distributed a summary of prior related NACIQI
6 policy statements to the members and we will be sure this
7 information gets to the new members as well. Since the meeting
8 minutes from the February meeting did not include a specific
9 charge for our sub-committee we talked about some of the
10 perspectives and items that would be considered for future
11 discussion.

12 These included striking a balance between broad
13 policy positions and the pragmatic aspects of staff and NACIQI
14 Committee reviews of accreditors, distinguishing staff review
15 considerations from the Committee review process, how best to
16 consistent examine accreditors to assure the Committee review
17 appropriately reflects that accreditors under review are “doing a
18 good job”, appropriately incorporating the insights from the 2-7-18
19 and this meeting’s briefings related to how data is used to inform
20 us.

21 Various success measures to include an examination
22 of the current Department provided dashboard metrics and

1 suggestions for further improvements and last but not least,
2 maintaining a broad perspective on related suggested policy rather
3 than focusing on specific recommendations on particular
4 legislative proposals.

5 We are also in the process of gathering some
6 additional related information from the financial aid officers who
7 have provided some insights into data that might inform us and
8 that concludes my report.

9 CHAIRMAN KEISER: Thank you Bobbie, other
10 questions for Bobbie -- very thorough -- thank you. We have come
11 to the conclusion about 10 minutes early. I am shocked. Thank
12 you. Any comments -- any comments from any of the members
13 before we adjourn?

14 MR. FRENCH: Do we need any action on
15 Bobbie's report?

16 CHAIRMAN KEISER: No, I don't think we need
17 action do you -- no it's a continuation.

18 MS. DERLIN: No, the work continues.

19 CHAIRMAN KEISER: Well then I would entertain
20 a motion to adjourn? All in favor -- I assume you all are in favor.
21 Bye-bye. Thank you for coming and we'll see you sometime next
22 year.
