White House Initiative on Historically Black Colleges and Universities

2019 NATIONAL HISTORICALLY BLACK COLLEGES AND UNIVERSITIES WEEK CONFERENCE

ENHANCING HBCU COMPETITIVENESS

September 8 – 11, 2019
Renaissance Washington, DC Downtown
999 9th Street, N.W.
Washington, D.C. 20001

Program is subject to change without notice.
The goals of our conference are to highlight the countless accomplishments of Historically Black Colleges and Universities (HBCUs) and to connect participants with opportunities that allow HBCUs to align their work with the nation’s competitive priorities. Toward these ends, the program is designed to heighten awareness of the many institutions, agencies, resources and individuals who support our aims—and who share the desire for HBCU students to be fully and equitably engaged in 21st century American life.

Check the official conference event app for current updates.
As executive director of the White House Initiative on Historically Black Colleges and Universities, I take great pride in joining with the Executive Office of the President of the United States and the U.S. Department of Education to welcome you to the 2019 National Historically Black Colleges and Universities Week Conference!

This year’s theme, Enhancing HBCU Competitiveness: Student Achievement. Quality Partnerships. Institutional Performance., continues to build on our guiding North Star — helping HBCUs successfully compete for top opportunities, while providing education and economic experiences that can improve standards of living for the students, people, and communities they principally serve.

This year’s conference packs quite a wallop, delivering more content than ever before. Our multi- and interdisciplinary tracks and sessions provide an unparalleled depth and diversity of information to improve prospects for enhanced HBCU competitiveness.

As we convene in Washington, D.C., following unprecedented gains in the past two years, we focus on top opportunities in the federal sector. It is time to heed the poignant instructions of Booker T. Washington to cast down our buckets where we are. In other words, HBCUs must not only win in Washington, D.C., but also in the states, counties, and cities in which our institutions are located.

Here is a way forward: Consider how your state, county, and city might replicate locally the demonstrated federal leadership of the president and executive agencies, through these five actions:

1. Mayors, county administrators, and governors should issue executive orders, modeled after the president’s, directing each city, county, and state department or agency to develop plans for how it will work with HBCUs.

2. More than $50 billion in R&D investment is annually received by federal agencies based in the 19 states with an HBCU — institutions and advocates should press for implementation in those very states of the president’s HBCU Executive Order 13779, directing federal agencies to work with HBCUs.

3. HBCUs should align and embed their institutions within local Comprehensive Economic Development Strategies, required by the Economic Development Administration.

4. Cities, counties, and states should designate HBCUs as Small Business Enterprises (SBEs), affording institutions access to all the available public- and private-sector SBE contracting vehicles that can improve prospects for achieving greater self-sufficiency.

5. HBCUs should link the president’s Opportunity Zones Executive Order 13853 to the HBCU Executive Order 13779, jointly leveraging them as powerful instruments for local HBCU development that create local competitive advantages for institutions.

Accessing assets and activating resources where we are necessarily complements our collective efforts in Washington, D.C. Let’s make sure we do not ignore these compelling opportunities.

Onward and upward!

JOHNATHAN M. HOLIFIELD
Executive Director

MEET & GREET

Free entry*

Sunday, September 8
5:30 P.M. – 6:30 P.M.

All registered conference attendees are invited to participate in the first annual Federal Agency Meet and Greet. The White House Initiative on Historically Black Colleges and Universities (Initiative) will host this networking event to provide attendees with the opportunity to meet members of the Federal Interagency Working Group (IWG). The IWG consists of over 30 federal agencies that have formal partnerships with the Initiative.

This event will allow attendees to build a professional support network for their institution by connecting with federal agencies and their staff who can provide guidance, intra-agency connections, updates on agency activities, and technical assistance support. This event will also provide attendees with the opportunity for increased visibility with agencies they are excited to learn more about and aspire to work with.

We encourage you to use this occasion as an opportunity to get to know the federal community and what it has to offer!

*Conference Registration Required

Dream It – Achieve It

FEDERAL CULTURAL FUNDING OPPORTUNITIES FOR HBCUs

September 10, 2019, 8:30 a.m.–5:30 p.m. | September 11, 2019, 8:30 a.m.–12:30 p.m.

Meeting Room 16
Renaissance Washington, DC Downtown Hotel | 999 Ninth St., NW, Washington, DC 20001

REGISTER FOR THE WORKSHOP WHEN YOU REGISTER FOR YOUR SESSIONS!

HAVE YOU WONDERED
- How to **successfully write a grant** for federal funding?
- What **funding opportunities exist** for arts and culture?

**Get the inside scoop** on how to effectively apply for cultural grants to support your programs with a valuable workshop given by U.S. federal agencies that award funds to HBCUs.

**PARTICIPATE IN ONE-ON-ONE GRANT-WRITING CONVERSATIONS**

WORKSHOP PARTICIPANTS ONLY
Join us for an exclusive early-morning tour of the National Museum of African-American History and Culture... **before the museum opens for the day to the general public!**

FOR QUESTIONS EMAIL HBCU@ARTS.GOV
Are you an HBCU and want to know how to win federal government contracts?

National HBCU Week 2019 Industry Day Event and Matchmaking Session

Wednesday, September 11, 2019
9:00 a.m.—1:00 p.m.
Renaissance Washington, DC Downtown Hotel
Grand South
999 9th Street, NW, Washington, DC

This is your opportunity to have in-person conversations with federal and industry leaders about potential contract opportunities!

All approved representatives of HBCU Sponsored Programs Offices, Research, Title III, Grants Administration, or Governmental Affairs Divisions are encouraged to attend!

Join us for face-to-face conversations about procurement between HBCUs, federal agencies, and prime contractors.

By participating in this event, you will obtain access to federal acquisition and program officials as well as potential industry teaming partners.

FEDERAL INVESTMENTS
The Unveiling of Transformational Federal Government Procurement Initiatives  
Renaissance A

The U.S. Department of the Treasury-Office of Small and Disadvantaged Business Utilization encourages HBCUs to align their strategic planned mission, goals, and objectives with Presidential Executive Order 13779, promoting academic excellence and innovation, to become competitive for federal procurements. HBCU leaders are encouraged to collaborate and engage U.S. government decision makers to support the Treasury and General Services Administration (GSA) federal government initiatives with instituting a GSA HBCU procurement tool. This session will (1) make HBCUs aware of federal government opportunities through grants, contracts, and cooperative agreements; (2) promote, support, and train HBCUs on how to do business with the U.S. government; (3) assist HBCUs with identifying GSA procurement set-aside opportunities, especially in the areas of cybersecurity, information technology, and professional services; (4) train and assist HBCUs with obtaining access to and securing federal contracts; and (5) educate HBCUs on government procurement programs and initiatives that HBCUs initially underutilized.

MODERATOR
MITCHELL D. WINANS
Special Assistant, Office of the Chief Procurement Officer, Internal Revenue Service  
U.S. Department of the Treasury

Breakout sessions continued on next page
Preparing HBCU Students for Success in the Workplace Through Corporate and Agency Partnerships

The Thurgood Marshall College Fund will discuss the key elements in creating internship and job placement programs that benefit both the student and the hosting entity.

**Facilitator:** Sean Burns
Assistant Vice President for Government Relations, Thurgood Marshall College Fund (TMCF)

**Panelist:** Andrea Horton
Executive Vice President of Programs, TMCF

STEM Research — A National Science Foundation Perspective to Improve Research and Funding Competitiveness

For the United States to maintain global leadership and competitiveness in science, technology, engineering, and mathematics (STEM), we must invest in research, encourage innovation, and grow a strong, talented, and diverse STEM workforce. By facilitating partnerships, communication, and cooperation, the National Science Foundation (NSF) aims to build and scale up what works in broadening participation programs to reach underserved populations nationwide. This session will provide information to assist HBCUs in preparing for NSF funding opportunities in computer and information technology.

**Moderator:** Francine Alkisswani
Telecommunications Policy Analyst, National Telecommunications and Information Administration
U.S. Department of Commerce

Second Chance Pell — Creating Opportunities That Change Lives

Meeting Room 12–14

The United States currently has the highest incarceration rate in the world, with approximately 2.2 million people incarcerated in American prisons and jails. Those who participate in education while incarcerated are 43 percent less likely to return to prison within three years than prisoners who do not participate in any correctional education programs. RAND has estimated that for every dollar invested in correctional education programs, four to five dollars are saved on three-year re-incarceration costs. Shorter College, one of the Second Chance Pell grant awardees, is contributing to the successful reentry of incarcerated persons by reducing recidivism, saving taxpayer dollars by lowering the direct and collateral costs of incarceration, and promoting public safety.

HBCU participation in this program makes us more sensitive to a large demographic that has been underserved and provides an opportunity to awaken the HBCU community to how we can better the outcomes of so many African Americans.

Director of Special Projects and Sponsored Programs, Division of Operations and Institutional Support, Shorter College

North Star Navigation to Career Empowerment

Mount Vernon Square

Many HBCU students are first-generation college students who have achieved academic success with few advantages. This session hopes to level the playing field by educating the students about effectively navigating the employment process, offering advice about career and professional development, and honing their resume writing and interviewing skills so that they may become competitive candidates in their communities and chosen professions. Most importantly, the session will inform the students about legal protections from employment discrimination that they may encounter during the application process and in the workplace. As a bonus, students who submit their resumes in advance will receive substantive written feedback that will improve their resume presentation and enhance their competitive edge.

How to Write a Competitive Research Grant Application to the Institute of Education Sciences  
(Part 1)  
Congressional A

During this 2 1/2 hour workshop, program officers from the Institute of Education Sciences, U.S. Department of Education, will provide instructions and advice on writing competitive applications to the Education Research Grants Program (84.305A) and the Special Education Research Grants Program (84.324). The workshop will focus on (1) the research topics that make up these two grant programs; (2) the research goal structure under which these programs operate; and (3) the four sections of the research narrative (significance, research plan, personnel, and resources) that comprise the most important part of the grant application. Direct instruction on these topics will be accompanied by a review of examples, information on applying these topics to participants’ own work, and discussion.

MONDAY, SEPTEMBER 9

TECHNICAL ASSISTANCE
Two-Hour Session

Capability Statements — Your University Resume
(Part 1)

Congressional B

HBCUs have significant experience in various levels of research. Since the experience with research is traditionally included with grant proposals, universities prepare booklets and other large documents providing details. When seeking more lucrative federal contracts, capability statements are the preferred method for presenting the university’s research capabilities. These one- to two-page documents highlight the institution’s research expertise. Capability statements take significant time and discipline to prepare properly. NASA has funded training sessions that allow universities to prepare for work in the federal contracts space. This technical training session will allow HBCUs to gain a better understanding of developing and using research capability statements.

NURSING MENTORSHIP AND TRAINING
Two-Day Session

Diversifying the Nursing Workforce: Mentoring for Student Retention and National Council Licensure Examination (NCLEX) Success at HBCUs
— INVITATION ONLY —

Meeting Room 8–9

This two-day workshop is part of a nursing track being held during the HBCU conference. This workshop is the second offering of a mentoring training program aimed at improving retention, graduation, and National Council Licensure Examination (NCLEX) pass rates among nursing students enrolled in traditional Bachelor of Science in Nursing (BSN) programs at HBCUs. Invitees include leaders from HBCU schools of nursing from across the country and state action coalition leaders from the Future of Nursing: Campaign for Action, an initiative of AARP Foundation, AARP, and the Robert Wood Johnson Foundation. The workshop’s interactive format is designed to build and enhance HBCUs’ capacity to increase the pipeline of culturally diverse students entering the field of nursing. This workshop is an excellent opportunity for you to strengthen BSN programs by further investing in workforce diversity.

This INVITATION ONLY event is co-sponsored by the Future of Nursing: Campaign for Action, the Office of Minority Health at the U.S. Department of Health and Human Services, and the National Partnership for Action to End Health Disparities. Beyond formal mentorship training, the workshop will include panel presentations with national experts in the field of nursing, as well as interactive workgroup sessions.

10 a.m. – 10:25 a.m. NETWORKING AND TRANSITION TO BREAKOUTS

breakout sessions continued on next page

INVITATION ONLY refers to separate invitations sent by the Future of Nursing: Campaign for Action and the Office of Minority Health at the U.S. Department of Health and Human Services to HBCUs with nursing students enrolled in traditional Bachelor of Nursing programs.

JUANA MENDENHALL
Morehouse College Visiting Faculty, Lawrence Livermore National Laboratory

QUALITY PARTNERSHIPS

Partnering in Engineering to Meet the Challenges of the 21st Century Workforce

Advancing Minorities’ Interest in Engineering is developing strategic partnerships across industry, government, and universities to prepare students to excel in the 21st century workforce, where significant shifts are taking place. STEM skills are required for 21st century jobs in areas including animation, nutrition, photography, architecture, and music, as well as jobs in traditional STEM industries. Competencies are now also essential in continuous learning, problem solving, collaboration, critical thinking, and communication. In addition, leadership skills, creativity, innovation, and an entrepreneurial perspective are needed to contribute to a successful workforce.

During this workshop, industry leaders and HBCU deans will share their success stories, lessons learned, and playbooks to show how to successfully develop win-win strategic partnerships needed to meet the challenges of the 21st century workforce.

MODERATOR  VERONICA L. NELSON
Executive Director, Advancing Minorities’ Interest in Engineering

PANELISTS  ROBIN COGER
Dean, College of Engineering, North Carolina A&T State University

INNOVATION AND RESEARCH

Transforming Capacity Building Through Vision and Leadership: Smart HBCUs

Smart campuses resemble smart cities. A smart HBCU is innovative; it uses information and communication technologies to improve quality of life, efficiency of operations and services, and competitiveness while meeting the economic, social, environmental, and cultural needs of the campus and host community. Smart HBCUs also support economic growth and competitiveness through cyberinfrastructures and campus-wide broadband networks. HBCUs that do not have access to this basic infrastructure cannot thrive and may even struggle to survive. High-speed, high capacity internet is a basic utility. Panelists will discuss their approaches to successfully compete for federal funding and garner private sector support for broadband. Panelists will discuss promising practices for developing smart HBCUs for student and institutional success through leadership and vision. The panelists are visionary CIOs who use telecommunications technology for capacity building and competitiveness. During this session, they will engage participants in a dialogue on fostering smart HBCU collaboration and competitiveness.

WORKFORCE DEVELOPMENT

Diversifying the Nursing Workforce, One HBCU at a Time

Representatives from three historically black colleges and universities in Maryland will highlight the power of partnership and collaboration in developing a statewide mentoring training initiative. This training is designed to help students stay in school, graduate, and pass their licensure exam.

This state-level partnership resulted from its members’ participation in a mentoring training workshop hosted by the Future of Nursing: Campaign for Action, an initiative of AARP Foundation, AARP, and the Robert Wood Johnson Foundation, and the Office of Minority Health at the U.S. Department of Health and Human Services. The campaign supports this mentoring training program to increase the diversity of the nursing workforce and to help the nation achieve health equity.

breakout sessions continued on next page
Higher Education aims to provide the skills needed to integrate successfully into a career and professional life. In the past, a clear-cut and concise path to follow has sustained the American Dream. However, the last decade has provided a burst of social innovation and entrepreneurship, creating an economic landscape that requires fresh perspectives, especially from within HBCU communities. Navigating the narrow space between entrepreneurship and impact can be challenging. However, maximizing millennial influence and networks with a strategy that supports their collective career development will position alums to benefit from one another and establish a sustainable social ethos. This workshop session aims to provide key tools and strategies to effectively transition the narrative of millennial professionals in the changing job market with an approach to social innovation.
A Framework for Increasing the Research Competitiveness of HBCUs*

This session presents a three-part framework for increasing the research competitiveness of HBCUs. The framework focuses on mechanisms of sustained institutional transformation that includes (1) broadening an understanding of the academic R&D enterprise, (2) creating partnerships between HBCUs and industry, and (3) developing faculty career trajectories to build more competitive research programs. Mechanisms of implementing this framework will be discussed, along with expected benefits and strategies for scaling and measuring progress.

Advancing Partnerships to Build Ecosystems in the Aerospace Industry

With the projected high demand of unmanned aerial vehicles, the multi-billion-dollar aerospace industry is growing. Demand for a diverse workforce is also increasing in both design and manufacturing in the aerospace industry. HBCUs have a significant opportunity to position themselves as leaders in this growth. NASA has taken the lead in supporting HBCUs and other minority-serving institutions in the aerospace industry, particularly high-volume manufacturing, by offering a cooperative agreement opportunity. The session will provide HBCUs with a better understanding of opportunities in the industry and give tips for collaborating with federal agencies, prime contractors, small businesses, and other institutions.

Elevating Your Talent Pipeline: A Case Study

Employers need the ability to influence the education of students to best meet the needs of their businesses. At the same time, students need to be armed with more than just a degree, as employers are looking for work experience and even specialized certification. The Society for Human Resource Management (SHRM) has been a leader in this area, providing customized curriculum to business schools and human resource programs and working with SHRM student chapters and advisors to provide employment, certification, and other opportunities to strengthen credentials. Learn from this case study the best practices to develop similar strategic partnerships and initiatives that will elevate the talent pipeline emanating from your institution.

Faculty Career Development: Federal Agency Resources and Opportunities to Enhance HBCU Competitiveness Through Student Achievement. Quality Partnerships. Institutional Performance

Faculty career development is a crucial factor for increasing institutional competitiveness. Federal agencies, like the Corporation for National and Community Service and the United States Department of Agriculture-National Institute of Food and Agriculture (USDA-NIFA) have many often-overlooked resources and opportunities for faculty at HBCUs to research and publish, enhancing their careers and their institutions. Our panel will describe pathways to accessing resources like funding and publication opportunities for early-, mid-, and late-career scholars. We will also discuss resources for faculty, like data sets, references, and existing research, which are essential tools for successful careers in academia. Finally, we will provide useful tools and opportunities for skill development to increase the productivity of faculty — necessary components of increasing overall HBCU competitiveness. We will present alongside USDA-NIFA, which offers similar resources and opportunities. This panel will interest scholars with research interests in volunteerism, civic participation, and inequalities, among other areas. Please bring your questions about research and development projects available for faculty at HBCUs.

QUALITY PARTNERSHIPS

Entrepreneurial Partnerships to Seed, Feed, and Sustain Strong, Thriving HBCUs

This session will introduce HBCU presidents and chancellors to new, collaborative entrepreneurial partnerships that can assist HBCUs in producing and marketing food to meet campus and community food service needs and turn a profit. These partnerships, including ones with restaurant associations, can increase the ability of HBCUs to meet campus and community development needs by leveraging federal, state, and commercial programs and by using an independent 501 (c) (3) non-profit as a dedicated financial partner conduit. This session also will address meeting the need of HBCUs for affordable benefits for staff, using a member pool to lower risks and costs, while increasing the number and quality of benefit plan features offered and thereby creating and sustaining independent funding streams to support the HBCUs’ activities. Participants in this discussion will hear from CEOs of the corporate partners and HBCU presidents who are already reaping financial and other benefits from the partnerships.

INNOVATION AND RESEARCH

Competing on Metrics: HBCUs Leading on Learning

Institutions of higher education are responding to rapid transformation and enhanced competition on metrics driven by accountability, transparency, and demands for evidence of student achievement. In a cooperative response to the current climate of metric competition, the National Institute for Learning Outcomes Assessment, the Office of Educational Outcomes and Assessment at Morehouse School of Medicine, and the Office of University Assessment at Florida Agricultural and Mechanical University joined together to conceptualize the HBCU Collaboration for Excellence in Educational Quality Assurance. HBCUs are uniquely positioned to lead on learning in the form of assessment. Assessment is an effective mechanism that when leveraged in the true spirit of continuous improvement can provide key insights into what institutions are doing to enhance and support student learning and development. This panel will present a highly successful partnership of assessment and institutional effectiveness professionals, who will provide their response for HBCUs as leaders of learning.

Bureau of Health Workforce Health Careers Pipeline and Diversity Programs  Renaissance A

The Health Resources and Services Administration Bureau of Health Workforce (BHW) improves the health of underserved and vulnerable populations by strengthening the health workforce and connecting skilled professionals to communities in need. BHW transforms the health care workforce by creating community-based training opportunities, recruitment and retention incentives, and sustained support for clinicians working in rural and underserved areas. BHW recruits, trains, and retains health care providers through scholarship and loan repayment programs. Through programs like the National Health Service Corps, Nurse Corps, and health careers pipeline and diversity programs, skilled professionals are ready to serve in Health Professionals Shortage Areas in rural and underserved communities. These programs play an integral role in training and educating underrepresented minorities (URM) and students from disadvantaged backgrounds interested in pursuing careers in health professions. This session highlights the HBCU Centers of Excellence (COE) Pioneers Program, which includes four legislatively designated institutions. The HBCU COE Pioneers have made a positive and sustained impact on the recruitment and retention of URM students and faculty into health professions careers.

Navigating the National Institutes of Health: Identifying Institutional Funding Opportunities and Increasing HBCU Student Recruitment

The National Institutes of Health (NIH) is a $38 billion operating division of the U.S. Department of Health and Human Services consisting of 27 institutes and centers. As the nation’s premier biomedical research entity, engaging Historically Black Colleges and Universities in NIH funding opportunities is crucial in furthering the nation’s behavioral and medical research.

The first 30 minutes of the workshop will introduce participants to two NIH programmatic areas, the All of Us Research Program and the Office of Special Populations, and to potential funding opportunities within both programs. The latter portion will provide an overview of the NIH Summer Internship and Pathways programs and will involve discussion around increasing HBCU student engagement/recruitment.

**Building Quality Partnerships Between Business and HBCUs to Create Workforce Solutions**

Meeting Room 12-14

Given the existing challenges businesses face in aligning what students are learning in college with the skills and talents they need to be successful in the workforce, companies must take proactive steps to bridge the gap. And, establishing quality partnerships with HBCUs is critical in doing just this. Learn about current investments businesses are making to meet talent demands, increase diversity, and increase the skills-based competencies of HBCU students seeking to transition to emerging and in-demand fields.

**Volunteering and Service: Be the Greater Good**

Mount Vernon Square

Serving in a national service program like AmeriCorps, Peace Corps, or Senior Corps asks a lot of you. But it also gives a lot back to you. When you serve, you foster growth in communities, develop leadership skills, and make a big difference in your country. Agencies such as the U.S. Department of Veterans Affairs rely on volunteers to help them achieve their mission and will share ways you can help them. This interactive session will help you identify which service opportunity is right for you and highlight the many benefits of serving. For example, returned Peace Corps Volunteers and AmeriCorps VISTA alumni are eligible for noncompetitive eligibility in federal hiring. The session will also include information about Senior Corps volunteer opportunities that you can share with your family and friends age 55 and older who are excited about enriching their own lives and benefiting the communities they serve.

**Dream It — Achieve It: Federal Cultural Funding Opportunities for HBCUs**  
Meeting Room 16

Have you wondered how to successfully write a grant for federal funding? Or what funding opportunities exist for arts and culture? Get the inside scoop on how to effectively apply for cultural grants to support your programs and your university with a valuable workshop given by four federal agencies that award funds. Participation includes an exclusive tour of the National Museum of African American History and Culture. The Federal Cultural Funding Opportunities workshop for HBCUs is an outreach and engagement effort hosted by the Arts and Humanities Culture team of the White House Initiative on HBCUs.

The goal of the workshop is to increase successful applications from HBCUs for federal cultural funding opportunities. During the workshop we will educate HBCUs about funding opportunities available within the cultural sector at the federal, state and local levels; identify and address challenges and needs HBCUs face in obtaining funding in the arts and humanities field; develop skills you need to submit successful applications; and talk about creating channels for career opportunities for arts and humanities majors at HBCUs through internships, fellowships, and jobs.

Join the National Endowment for Arts, the National Endowment for the Humanities, the Institute of Museum and Library Services and the Advisory Council on Historic Preservation to foster greater awareness and deeper relationships between the arts and humanities and your college or university and create a clear picture of the financial opportunities available to HBCUs.

The Benefit of HBCUs Developing Data Science Programs

The conference will host a one-day, five-hour workshop that will address the history, ecosystem, trends, career paths, and cultural impact of eSports and the data science industry.

How can HBCUs position themselves to compete in the burgeoning, data-driven economy? How can HBCUs leverage sports to develop a pipeline of students that will pursue degrees in science, technology, engineering, and math (STEM)? Join us for discussions with experienced leaders from academia and the private sector regarding compelling solutions to develop data science programs and sports analytics curricula at HBCUs. By offering data science programs and sports analytics curricula, HBCUs can develop a pipeline of students who will graduate primed to make data-driven decisions. In addition to driving enrollment, data science and sports analytics are key to increasing HBCU revenue and promoting entrepreneurship.

Participants will explore how HBCUs can position themselves as global leaders in efforts to improve society through teaching and research based on the powerful, emerging field of data science. The amount of available data in the world is more than doubling every two years, and there is a shortage of qualified data scientists to analyze and interpret the data and to help make data-informed decisions for the betterment of society. Schools of data science, which may offer both graduate and undergraduate degrees and certificates, help to meet a soaring demand for qualified data science professionals in a field that plays a key role in the global information-based economy.

**FACILITATOR**

NETWORKING AND TRANSITION TO BREAKOUTS

*INVITATION ONLY* refers to separate invitations sent by the Future of Nursing: Campaign for Action and the Office of Minority Health at the U.S. Department of Health and Human Services to HBCUs with nursing students enrolled in traditional Bachelor of Nursing programs.
### Promoting Cybersecurity Capabilities and Competencies

Renaissance A

The U.S. Intelligence Community (IC) is dedicated to identifying and mitigating risks from foreign intelligence entities that are actively targeting information, assets, and technologies vital to both our national security and global competitiveness. This session will expand participants’ understanding of how the IC uses detection and understanding of cyber threats against the U.S. to inform and enable national security decision-making and policy creation. Participants can expect to learn what skills and abilities are necessary to thrive in the cybersecurity realm and how the individual perspective of HBCU graduates is integral in augmenting our comprehension of these continuously evolving threats. This session offers opportunities for further collaboration between the IC and HBCUs to work in tandem in promoting existing cyber capabilities and developing new competencies.

**SPEAKERS**

**MAURICE BLAND**
Deputy Chief, Cybersecurity Operations Group, Office of the Director of National Intelligence

**THOMAS FREEMAN**
Deputy Chief, Mathematics Research (Cybersecurity), National Security Agency

### Building Partnerships to Increase HBCUs Workforce Dynamics in 2020 and Beyond

Renaissance B

This workshop session provides HBCUs insight on how to develop strategic partnerships; identify partners with common interests; engage in focused networking; create and take advantage of potential and actual partnering opportunities; and transition partnerships from short-term to long-term relationships to help strengthen institutional infrastructure initiatives and achieve multiple mission objectives. The intended outcomes of the workshop session are to (1) identify best partnering practices that are proven “change agents”; (2) foster audience awareness of current efforts to build a diverse skilled workforce that reflects a changing America (for example, shifting population make-up, cultural and generational differences, transforming thought processes and work environments, and continuous technological innovations); and (3) equip participants with knowledge that they can immediately apply to take advantage of available federal government and public-private resources, financial support (for example, grants, contracts, cooperative agreements, and Memorandums of Understanding), training and career development options, and employment placement prospects.

INNOVATION AND RESEARCH

HBCUs Are Underutilized Resources for the Nation: 10 Recommendations to Enhance Student Achievement and Institutional Performance at HBCUs

Representatives of the National Academy of Sciences will present the findings and recommendations from their recent research report, *Minority Serving Institutions: America’s Underutilized Resource for Strengthening the STEM Workforce*. The focus will be on their recommendations to MSIs, Congress, industry, and local, state, and federal agencies to implement specific evidence-based policies, strategies, partnerships, and programs that strengthen STEM education and research on HBCU campuses — with the goal of tapping the talents and energy of HBCU graduates to drive the nation’s economic competitiveness. This session will focus on “what works” in terms of positioning HBCUs as powerful incubators of STEM innovation and talent for the country, and as economic engines for local, regional, and national job growth. This discussion will provide an opportunity for the audience to share perspectives on the report’s findings and to propose other innovative strategies to enhance HBCU competitiveness.

WORKFORCE DEVELOPMENT

A Glimpse Into Corporate Procurement and Entrepreneurship

Representatives of the Billion Dollar Roundtable Inc. and other corporations will discuss some of the benefits of supplier diversity covering the broad aspects of entrepreneurship for diverse entities and the applicable opportunities that exist within the supply chain of corporate America. The impact of supplier diversity within the supply chain is valuable and measurable. Corporations and organizations robustly engaging diverse suppliers within their supply chains create a formidable return on investment that translates into economic empowerment, job creation, and community development. The objective is to highlight an entrepreneurial career path across academic disciplines.

STUDENTS AND YOUNG ALUMNI

Service Project,* Remainder of the Day

* Events for HBCU Competitiveness Scholars, Presidents, Chancellors and other VIP attendees
Senior leadership and staff from Federal Student Aid (FSA) will provide an overview of new initiatives and technology enhancements for students and institutions related to the Next Gen project. Highlights and information will be shared along with a projected roll-out timeline. A major overview and highlight of services provided to Historically Black Colleges and Universities through FSA’s Project Success pilot phase will be shared along with an announcement regarding plans for an extension of this exciting new project. HBCU presidents will also receive an executive overview of the major compliance and administrative challenges associated with the Title IV programs.

Strengthening Partnerships Between the U.S. Department of Agriculture (USDA) and Historically Black Land-Grant Colleges and Universities

Renaissance A

USDA’s Office of Partnerships and Public Engagement (OPPE) has established a sustainable process focusing on locally driven bottom-up solutions to address challenges and issues faced by underserved distressed communities. The process will create a climate of success that will foster hope and opportunity, create wealth, and build assets.

To achieve success, OPPE will establish 27 Centers of Community Prosperity, which will strengthen partnerships and align with USDA supported Land Grant Institutions. We will work in partnership with these and other HBCUs to provide targeted outreach, processes, and strategies to bring sustainable long-term results for our communities. They will also provide opportunities to broaden USDA’s ability to reach and support minority students studying agriculture, food, natural resource sciences, and finance. It will ensure equitable participation in USDA programs, services, and resources for rural, tribal, and historically underserved students and communities and support capacity-building initiatives that bolster education and career opportunities for students and faculty and assist in developing a strong pipeline of talent for USDA.

This is an investment in our next generation of agricultural professionals. OPPE is developing a robust outreach effort in partnership with USDA agencies to ensure that deserving young people are aware of this great opportunity.

SPEAKER
MIKE BEATTY
Director, Office of Partnerships and Public Engagement, U.S. Department of Agriculture

QUALITY PARTNERSHIPS

Firming the Department of Education’s Collaborative Relationship With the Institutional Service Program Partners

Renaissance B

This session will focus on strengthening the communication and the relationship between our institutional partners and the Department of Education. Presentations will be conducted on how to successfully develop and implement the Comprehensive Development Plans and Activities; how to successfully complete the Institutional Service Annual Performance Report Form; and how to successfully implement Title III Endowment Activities.

SPEAKERS
SHERYL WILSON
Director, HBCU/Predominately Black Institution Division, U.S. Department of Education

JAMES LAWS
Director, Strengthening Institutions Division
Acting Director, Institutional Development Division, U.S. Department of Education

INVITATION ONLY refers to separate invitations sent by the Future of Nursing: Campaign for Action and the Office of Minority Health at the U.S. Department of Health and Human Services to HBCUs with nursing students enrolled in traditional Bachelor of Nursing programs.
INNOVATION AND RESEARCH

A Competitive Edge: Leveraging Researcher-Practitioner Partnerships for Impact and Scale

HBCUs in Mississippi have formed a collective partnership to promote a unified, culture-based approach to student success to enhance institutional competitiveness, build research capacity, and increase students’ readiness to compete regionally and nationally. In this session, you will learn about this statewide, strategic model for institutional partnering, supported by the Regional Educational Laboratory Southeast (REL Southeast). The REL Southeast partners with HBCUs for the purpose of enhancing the use of research-based knowledge and strategies to improve the retention, matriculation, and graduation rates of students at these institutions. In this session, Alcorn State University and the REL Southeast will share insights on partnerships that produce rigorous research and resources to inform institutional initiatives to increase student outcomes. The presenters will also share evidence-based strategies that facilitate successful, strategic partnerships to stimulate innovation, enhance impact and scale, and support sustainability, strengthening the role of HBCUs in ensuring U.S. competitiveness.

WORKFORCE DEVELOPMENT

Leveraging Relationships in the Media and Technology Landscape

Meeting Room 12–14

This special session will bring together a consortium of media, entertainment, and technology leaders for a discussion with HBCU students and community leaders that will enhance and expand knowledge essential for equipping the next generation of industry leaders for careers in entertainment and technology. Industry leaders will share their organizations’ diversity and inclusion goals of employing a workforce that reflects the communities they serve and the critical role HBCUs will play as centers for diversity in the global creative economy. We will discuss accessible career pathways, including the industry’s latest diversity pipeline workforce initiative—the HBCU in LA (Los Angeles) Internship Program—and the skills needed in today’s creative media and emerging technology workforce.

FACILITATOR  STACY MILNER
Founder, Entertainment Industry College Outreach Program

TASMIN PLATTER
Head of Human Resources, Endeavor Content
Demand for talented people trained in STEM disciplines is growing rapidly. The shortage of students from underrepresented populations pursuing STEM fields is due, in part, to a lack of diversity within the STEM teaching workforce. The Smithsonian Science Education Center and Shell Oil Company are committed to tackling the recruitment and retention of teachers representative of today’s student body. Discover the existing features of this public-private partnership and brainstorm strategies for scaling the work. Session participants will engage in conversations to share their own challenges, best practices, and efforts to tackle this topic within their HBCUs, while considering opportunities for future collaboration.

QUALITY PARTNERSHIPS

Building Quality Inclusive Tech, Startup, and Venture Ecosystem Partnerships in Communities of Color to Close the Wealth Gap

Renaissance B

By 2053, the median wealth and net worth of African Americans is projected to be zero. Accelerated by the future of work and Fourth Industrial Revolution, it will be difficult for socially disadvantaged communities to counter the negative economic impact and segregation due to innovation density — unless these communities are rapidly exposed, skilled, hired, accelerated, incubated, and funded at scale to equitably participate at all levels of the innovation, entrepreneurship, and investment ecosystems that are driving our future at an unprecedented pace.

Entrepreneurship is a powerful tool to grow local and global economies. As a result, an emerging economic development practice called entrepreneurship ecosystem building has increased in focus over the past decade. Entrepreneurship ecosystems are the local culture, individuals, organizations, policies, and resources that work interactively to help entrepreneurs start and grow high-growth companies. In this economic development strategy, local developers, known as ecosystem builders, work to build the capacity of the entrepreneurship ecosystem in order to create local economic growth. While the field is new and exciting and has tremendous economic development potential, it has been limited in addressing issues of diversity, equity, and inclusion. There is an even greater deficit in thought, research, and best practice-sharing around ecosystem building in communities with concentrated populations identified by race and ethnicity, which here we will call communities of color.

breakout sessions continued on next page
This session will provide your executive VIPs, HBCU leadership, government agency leaders, economic development leaders, and those interested in using high-growth entrepreneurship to build local economies in communities of color an overview of key concepts, general recommendations, and best practices required for forming quality industry partnerships. This can ensure that HBCUs are doing their part to see that the communities they serve have the exposure, skills, network, and funding necessary to equitably generate opportunities and multi-generational wealth with no reliance on preexisting multi-generational wealth.

eSports Analytics Curricula at HBCUs: Building a STEM Talent and Career Development Pipeline  
Meeting Room 10–11

Educators and policymakers have spent decades trying to recruit and retain more underrepresented minority students into the STEM pipeline. However, according to the 2017 data reported by the Computing Research Association, only 3.7 percent of all new recipients of bachelor’s degrees in computing are African American. In this session, participants will explore how HBCUs can establish sports analytics majors and curricula to boost minority interest and broaden participation in STEM. Sports analytics programs educate students on the principles of research methodology, sport economics, database management, finance, computer mathematics, statistics, and economics. These tools are integral to understanding and prioritizing information to maintain a competitive advantage in the global information-based economy. Participants will also explore the benefits of HBCU STEM faculty serving as advisors to local high school sports analytics clubs, including the development of a STEM talent acquisition pipeline. Sports analytics course and degree offerings will drive enrollment, increase revenue, and develop a new generation of entrepreneurship.

Meeting Room 16

9 a.m. – 2 p.m.  MEETING OF THE PRESIDENT’S BOARD OF ADVISORS ON HBCUs

Renaissance East

The President’s Board of Advisors on HBCUs serve to advise the president, through the White House Initiative on Historically Black Colleges and Universities, on all matters pertaining to strengthening the educational capacity of HBCUs. Members of the general public are invited to attend this open meeting.

9 a.m. – 1 p.m.  HBCU INDUSTRY DAY EVENT AND MATCHMAKING SESSION

Grand South

Are you an HBCU interested in diversifying your revenue through federal acquisition funding? Join the U.S. Department of Health and Human Services, National Institutes of Health, and the U.S. Department of the Treasury for this inaugural HBCU Industry Day event and matchmaking session. This is your opportunity to obtain access to federal acquisition and program officials as well as potential industry teaming partners.

11 a.m. – 2 p.m.  CURRENT STUDENT AND RECENT GRADUATE CAREER FAIR

Grand North

The White House Initiative on Historically Black Colleges and Universities will host its inaugural HBCU Career Fair for students and alumni. Career fair objectives include introducing HBCU students and alumni to career, fellowship, and intern opportunities; encouraging stakeholders and external partners to recruit from HBCU talent; serving as a forum that fosters public-private partnerships that will reinforce the vital importance of HBCUs and their impact on U.S. competitiveness in the global economy; and sustaining dialogue to encourage collaborations among participants, institutions, and students.

Thank You For Joining Us!

The White House Initiative on Historically Black Colleges and Universities recognizes 44 students from 34 HBCUs who have been selected as 2019 HBCU Competitiveness Scholars — the Initiative's highest student recognition.

Comprised of undergraduate, graduate, and professional students, Competitiveness Scholars are recognized for successfully preparing to compete for top opportunities that improve standards of living. Each was nominated and endorsed by their institution president, which itself is an honorable mention. Those nominated were selected from among several highly distinguished students at their HBCU institution. The Competitiveness Scholars hail from over 20 states, the Bahamas, and Africa and were chosen based on their academic achievement, campus and civic involvement, and entrepreneurial ethos or “go-getter” spirit.

Below is a list of the 2019 WHIHBCU Competitiveness Scholars, in alphabetical order by HBCU.

EXECUTIVE ORDER

BY THE AUTHORITY VESTED IN ME AS PRESIDENT BY THE CONSTITUTION AND THE LAWS OF THE UNITED STATES OF AMERICA, AND IN ORDER TO ADVANCE OPPORTUNITIES IN HIGHER EDUCATION, IT IS HEREBY ORDERED AS FOLLOWS:

Section 1. Policy. Historically black colleges and universities (HBCUs) have made, and continue to make, extraordinary contributions to the general welfare and prosperity of our country. Established by visionary leaders, America’s HBCUs have, for more than 150 years, produced many of our Nation’s leaders in business, government, academia, and the military, and have helped create a black middle class. The Nation’s more than 100 HBCUs are in 20 States, the District of Columbia, and the U.S. Virgin Islands, and serve more than 300,000 undergraduate, graduate, and professional students. These institutions are important engines of economic growth and public service, and they are proven ladders of intergenerational advancement.

A White House Initiative on HBCUs would: advance America’s full human potential; foster more and better opportunities in higher education; strengthen the capacity of HBCUs to provide the highest-quality education; provide equitable opportunities for HBCUs to participate in Federal programs; and increase the number of college-educated Americans who feel empowered and able to advance the common good at home and abroad.

Sec. 2. White House Initiative on HBCUs.

(a) Establishment. There is established the White House Initiative on Historically Black Colleges and Universities (Initiative), housed in the Executive Office of the President and led by an Executive Director designated by the President.

(b) Mission and Functions. The Initiative shall work with agencies, private-sector employers, educational associations, philanthropic organizations, and other partners to increase the capacity of HBCUs to provide the highest-quality education to an increasing number of students. The Initiative shall have two primary missions:

(i) increasing the private-sector role, including the role of private foundations, in:

(A) strengthening HBCUs through enhanced institutional planning and development, fiscal stability, and financial management; and

(B) upgrading institutional infrastructure, including the use of technology, to ensure the long-term viability of these institutions; and

(ii) enhancing HBCUs’ capabilities to serve our Nation’s young adults by:

(A) strengthening HBCUs’ ability to equitably participate in Federal programs and exploring new ways of improving the relationship between the Federal Government and HBCUs;

(B) fostering private-sector initiatives and public-private partnerships while promoting specific areas and centers of academic research and program-based excellence throughout HBCUs;

(C) improving the availability, dissemination, and quality of information concerning HBCUs in the public policy sphere;

(D) sharing administrative and programmatic best practices within the HBCU community;

(E) partnering with elementary and secondary education stakeholders to build a “cradle-to-college” pipeline; and

(F) convening an annual White House Conference on HBCUs to address, among other topics, matters related to the Initiative’s missions and functions.
(c) Federal Agency Plans.

(i) The Secretary of Education (Secretary), in consultation with the Executive Director, shall identify those agencies that regularly interact with HBCUs.

(ii) Each agency identified by the Secretary under subsection (c)(i) of this section shall prepare an annual plan (Agency Plan) describing its efforts to strengthen the capacity of HBCUs to participate in applicable Federal programs and initiatives. Where appropriate, each Agency Plan shall address, among other things, the agency’s proposed efforts to:

(A) establish how the agency intends to increase the capacity of HBCUs to compete effectively for grants, contracts, or cooperative agreements;

(B) identify Federal programs and initiatives where HBCUs are not well represented, and improve HBCUs’ participation in those programs and initiatives; and

(C) encourage public-sector, private-sector, and community involvement in improving the overall capacity of HBCUs.

(iii) The head of each agency identified in subsection (c)(i) of this section shall submit its Agency Plan to the Secretary and the Executive Director no later than 90 days after being so identified, and submit an updated Agency Plan annually thereafter.

(iv) To help fulfill the objectives of the Agency Plans, the head of each agency identified by the Secretary may provide, as appropriate, technical assistance and information to the Executive Director to enhance communication with HBCUs concerning the agency’s program activities and the preparation of applications or proposals for grants, contracts, or cooperative agreements.

(v) Each agency identified by the Secretary shall appoint a senior official to report directly to the agency head on that agency’s progress under this order, and to serve as liaison to the Initiative.

(d) Interagency Working Group. There is established an Interagency Working Group, which shall be chaired by the Executive Director and shall consist of one representative from each agency identified by the Secretary pursuant to subsection (c)(i) of this section, to help advance and coordinate the work required by this order.

Sec. 3. President’s Board of Advisors on HBCUs.

(a) Establishment. There is established in the Department of Education the President’s Board of Advisors on Historically Black Colleges and Universities (Board). The Board shall consist of not more than 25 members appointed by the President. The Board shall include the Secretary, the Executive Director, representatives of a variety of sectors — such as philanthropy, education, business, finance, entrepreneurship, innovation, and private foundations — and sitting HBCU presidents. The President shall designate one member of the Board to serve as its Chair, who shall help direct the Board’s work in coordination with the Secretary and in consultation with the Executive Director. The Chair shall also consult with the Executive Director regarding the time and location of the Board’s meetings, which shall take place at least once every 6 months.

(b) Mission and Functions. The Board shall advise the President, through the Initiative, on all matters pertaining to strengthening the educational capacity of HBCUs. In particular, the Board shall advise the President in the following areas:

(i) improving the identity, visibility, distinctive capabilities, and overall competitiveness of HBCUs;

(ii) engaging the philanthropic, business, government, military, homeland-security, and education communities in a national dialogue regarding new HBCU programs and initiatives;

(iii) improving the ability of HBCUs to remain fiscally secure institutions that can assist the Nation in achieving its educational goals and in advancing the interests of all Americans;

(iv) elevating the public awareness of, and fostering appreciation of, HBCUs; and
(v) encouraging public-private investments in HBCUs.

(c) Administration. The Department of Education shall provide funding and administrative support for the Board, consistent with applicable law and subject to the availability of appropriations. Members of the Board shall serve without compensation, but shall be reimbursed for travel expenses, including per diem in lieu of subsistence, as authorized by law. Insofar as the Federal Advisory Committee Act, as amended (5 U.S.C. App.), may apply to the Board, any functions of the President under that Act, except for those of reporting to the Congress, shall be performed by the Chair, in accordance with guidelines issued by the Administrator of General Services.

(d) Report. The Board shall report annually to the President on the Board’s progress in carrying out its duties under this section.

Sec. 4. Revocation of Executive Order. Executive Order 13532 of February 26, 2010 (Promoting Excellence, Innovation, and Sustainability at Historically Black Colleges and Universities), as amended, is revoked.

Sec. 5. General Provisions.

(a) For the purposes of this order, “historically black colleges and universities” shall mean those institutions listed in 34 C.F.R. 608.2.

(b) This order shall apply to executive departments and agencies designated by the Secretary. Those departments and agencies shall provide timely reports and such information as is required to effectively carry out the objectives of this order.

(c) The heads of executive departments and agencies shall assist and provide information to the Board, consistent with applicable law, as may be necessary to carry out the functions of the Board. Each executive department and agency shall bear its own expenses of participating in the Initiative.

(d) Nothing in this order shall be construed to impair or otherwise affect:

   (i) the authority granted by law to an executive department or agency, or the head thereof; or
   (ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(e) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(f) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

DONALD J. TRUMP

THE WHITE HOUSE,
